Liberal and SDP grassroots merger under way

By Philip Webster, Political Reporter

under way in many parliamentary constituencies, regardless of both parties' leaders, according to a Liberal Party survey.

The survey of the perform-

ance of the two parties working together in 278 representative constituencies at the general election found that Liberal associations backing the Alliance outnumbered those opposing it by seven to one.

The evidence that the over-

whelming majority of Liberals regard the Alliance as a success and want the relationship to prepares to face renewed criticism from activists and some MPs over his leadership and the Alliance at the Liberal assembly next month.

Details of the survey are

given today in an article by Mr John Griffiths, the Liberal Party

president, in Liberal News. He says that "in practical terms" mergers are now taking place in some constituencies and gives a warning that excessive pressure from the leaderships would be counter-productive. A national shareout of seats, as at the election, could never work again, he said. Mr Griffiths's comments, and

the survey itself, add to the pressure coming from the Liberals and some sections of the SDP for a joint selection of

A merger between the Liberal parliamentary candidates by and Social Democratic parties is members of both parties. Dr many others in his party who against 5 wish the parties separate campaigns, identities to be preserved.

Mr Grif

Mr Griffiths argues that the parties will have to devise a broad democratically endorsed agreement in principle about the development of the Al-liance, within which individual constituencies or groups of constituencies could take their own decisions.

"In my view. Liberals are now far less afraid that the SDP become still closer comes as a will dilute their radicalism, and boost to Mr David Steel as he the Social Democrats are less worried about being swallowed up by their local Liberal parties", he says.

> The most striking feature of the survey of the associations was the way fighting the election together improved relations between Liberals and ocial Democrats, according to Mr Griffiths.

Before the elections, relations in 42 per cent of the 110 SDP-led and Liberal-led seats were considered to be either good or excellent. Afterwards, that had increased to 66 per cent. Sixty-five per cent of SDP candidates were considered by their Liberal supporters to be good or excellent and 25 per cent average.

The Liberals were less com-

plimentary about the campaigns fought by their colleagues, 22 David Owen, the SDP leader, is per cent of SDP campaigns were opposed to that idea along with considered below average as many others in his party who against 5 per cent of Liberal

Mr Griffiths says the SDP emerged generally with great credit in terms of commitment to the Alliance. The SDP stuck to the agreed SDP/Liberal description on their posters over leaflets almost without exception, but only 26 per cent of Liberal seats did the same and 47 per cent made no reference at all to the SDP in

Most said that was for tactical reasons, and that the Alliance was otherwise working well in their constituencies.

The Liberals supplied 60 per cent of the Alliance workforce of over 100,000 helpers but the SDP provided almost two-thirds of the total Alliance expenditure of between £2.5m and £3m.

From the survey. Mr Griffiths said it was reasonable to deduce that for every association that was anti-alliance there were seven for and one

In many constituences, en-dorsement of the present allo-cation of seats, joint selection and even, in practical terms, merger was now taking place regardless of views expressed by

New indoor pools 'a health hazard'

Modern indoor swimming pools can be a hazard to people prone to asthma and chest complaints. So although swimming is promoted as an activity in which asthmatics can participate without experiencing exer-cise-induced wheezing, the re-verse is the case, in such pools.

Neighbour's

'war' lasted

four years

An uneasy peace descended on a tiny village last night as a farmer and his wife were given suspended prison sentences for their part in a four-year war of

mare in a deliberate campaign

of harassment almost as soon

as they set up in the Humber-

side village of Melbourne, on the edge of the Yorkshire

olds. The £50,000 retirement

bungalow they built themselves in Kidd Lane became a virtual

prison for them as the Brooks

whose hundred-acre Grange

Farm lay 500 yards away, bombarded them with insults,

But in sentencing the Brooks

for 12 months, for breach of an order forbidding them to molest their neighbours, the judge also said Mr Mallinson, aged 49, was "hypersensitive" and "vol-

Brook, aged 47, and his wife,

aged 43, were each fined £250 for breaking the original injunction and ordered to pay to

costs of the two-day hearing estimated at about £2,000.

After the case Mrs Mallin-son, aged 46, a local govern-ment officer said: "We feel sorry for the Brooks. I don't think they realized the serious-ment of the citartion.

develop a "thicker skin".

and advised him to

abuse, and threats.

York County Court in silence after a judge had branded their behaviour towards their neigh-bours as "vindictive, insensitive The reasons modern indoor pools are not so good as older ones is explained in the latest issue of the British Medical Journal by Dr Philip Penny, an Judge Geoffrey Baker, QC, had heard how Mr Rou Mallinson and his wife's lives had been turned into a nightoccupational health physician at Musgrave Park Hospital, Tann-

ton, Somerset, and medical adviser to the Amateur Swimming Association. The trouble lies in the greater efficiency with which the modern pools are operated to save energy.

Advanced heat reclamation systems which recirculate pool

air, concentrated gaseous substances in the atmosphere unlike old-fashioned extractor fans. There are about 200 swimming pools in the new

ory Centres yesterday.

Dr Penny conducted a survey in which bathers were vigorously active for 20 minutes. It became apparent that some people with no history of reathing spasms suffered

One case involved a man aged 57 who was in excellent health and who swam regularly in two pools in the same town, one of the new design and one of the old. The man complained of coughing for 12 to 24 hours after swimming in the modern pool, with the problem being worse in the winter. He had no history of asthma-type illness.

Dr Penny says contrary to popular belief the chlorinous smells in swimming pools are caused not by chlorine gas but by nitrogen trichloride (an intense irritant).

In modern pools complaints of respiratory and eye irritation spectators and staff he says.

Fewer teenagers pregnant Mrs Caroline Woodroffe, chairwoman of the centres, said

the figures "give the lie to people saying that access to sex education means more tecnfallen during the past decade although abortions have increased slightly, according to figures from the Brook Advisagers pregnancies". "I think these figures show

that teenagers have now learned to use contraceptives more responsibly at a time when the rate of sexual activity among people has gone un."

She said there was a tremen-dous demand for contraception advice from young people. The centres' 16 clinics, which saw 60,000 people a year, were constantly turning people away.

Wildlife Act 'no protection'

Instead of affording protec-tion for threatened birds of prey, the Wildlife and Country-side Act has become a rubber stamp for widespread nest robberies, the Royal Society for

yesterday.
Writing in the lainst issue of the society's magazine, Birds, Mr Ian Presst, its director, describes the situation as

"desperately worrying".

"By early July we know of over 70 peregrine eyries in England, Wales and Scotland that had been robbed this year", he says. "With an average clutch of four eggs, this could represent as many as 280 peregrins, taken either as eyes peregrims, taken either as eggs to be hatched in incubators or

to be hatched in incubators or young birds put into aviaries to prove fraudulent claims of captive breeding to the visiting inspector from the Department of the Evironment."

A similar story could be told for goshawks, buzzards and other native birds of prey, all of which are subject of registration under the new years.

The speciatr wants a ben on

The society wants a ban on is sure that its registration scheme is working, Given the high level of thefts of wild peregrines and the acknowledged difficulty of breeding these birds in captivity, many sales must be regarded with respicion, it said.

The society yesterday discounted any connexion between the hot summer and recent sightings of rare non-native

Last week a royal tern, which is native to North America and the west coast of Africa, was reported to have been seen in Norfolk. There have also been sightings of Axiatic needle-tailed swift and the white-throated robin.

In an average year about eighty rare species were sig-hted, and this year was nothing out of the ordinary, an official

Dry spell Marital advice may puts potato have to be paid for prices up

clients for advice, even on a

Despite a record 15,000 interviews last year, local authority grants to the council fell for the first time in its history. It ended nearly £1,000 in the red.

"If this pattern is repeated over the coming years, then the future for London Marriage Guidance in its present form looks bleak", the council's annual report says.

"If our grants do not hold up, then the alternatives are depressing. We could instigate a minimum charge or we could go in for some kind of meanstesting to determine each client's fee."

Such distasteful measures would discourage poorer people from using a service they trust. grants. But if we cannot generate better grants from local authorities and the Greater London Coucil, we shall have no

alternatives", the report adds. The Greater London Council having halted an £8,000 grant, the council received £41,346 from local authorites and £71,487 from clients' contributions. A decade ago grants were more than double the level

of contributions. Mrs Renate Olins, the council's director, said yesterday; pays off."

Acute financial difficulties "This is wrong and depressing may force the London Marriage because it is a subtle way of Guidance Council to charge driving us into the private sector, which is not where we vant to go, nor where we should

"The message is that local authorities in general and the GLC in particular should consider funding us at a more realistic level,"

In its report the council admits to running a system of the rich subsidizing the poor. But it suggests that clients' contributions are unlikely to increase because its service is used mostly by "ordinary people", including an increasing number of the unemployed.

From them we gladly accept token contributions of 25p or 50p a counselling session, but we can continue with this policy only so long as our budget is balanced by local authority

One London borough, Hammersmith and Fulham, paid the council £1,500 last same as in 1978, and is now the lowest contributor despite receiving a "particularly good service".

The report concludes: "We do not intend to let ourselves be driven into the private sector by charging realistic feet and we are determined to continue to offer our help where it is needed: rather than where it there was no guarantee of a

Man lost job over Russian fiancée

An electrician who fell in love with a Russian woman while working for his company in the Soviet Union and who was dismissed after disobeying an order not to return there had his appeal against unfair dismissal rejected at an industrial tribunal in London

esterday. Captain Roger Fisher, the tribunal chairman, told Mr Ray Ninnis, aged 35, from Platts Lane, West Hampstead: "This case borders on the line of being frivolous, vexatious and unreasonable"

When Captain Fisher was told there was no application for costs, he added: "Consider yourself very lucky. None of us who sit here have heard such a stupid and unreasonable application. You have cost the company a lot of time and

Mr Richard Seymour, counsel for C.A. Controls, of Hammersmith, west London, told the tribunal that Mr Ninnis had been refused permission to fly to a contract in Nigeria via Moscow so he could visit his figncée to make marriage arrangements. He said: "The firm was

worried that Mr Ninnis would get into trouble with the hoping to get the girl out of the country. They were in the process of negotiating a contract worth 26m with the Russians and it was thought his proposed project would jeopardize it."

Mr Ninnis carned £300 a week with the firm, which instals printing machines worldwide.

Mr Terrance Winter, the firm's chief executive, said: "I refused permission because he could have got into trouble and been detained. I suggested he make a tourist visit after his return from Nigeria.

Mr Seymour said that Mr Ninnis disobeyed instructions and after completing the work in Nigeria flew straight to Moscow instead of returning to London.

He was not heard from until he turned up at the London office two weeks later and said that he had asked a colleague to pass on a message saying where he had gone, Mr Seymour said.

After the hearing Mr Ninnis said that he planned to "very attractive interpreter" he met last September in a Moscow restaurant, in about

Briton in Saudi jail says he was tortured

Mr Keith Carmichael, 2 British businessman, has been held without trial in Saudi Arabia since 1981 despite the personal intervention of the Foreign Secretary, allegations of torture, and now a hunger

His contracting company, Sacen International, collapsed with debts alleged by the authorities to total almost fim. Sandi companies are among those said to be owed money, which is sufficient reason under Sandi lew for his detention unless creditors waive their claims.

Mr Carmichael, aged 49 wrote to me on August 5, saying he was on his twenty seventh day of a hunger strike to obtain some relief. Amnesty international, which has taken up his case, said: "All along he has been trying to achieve

release or medical treatment in a hospital outside Saudi Arabia." Amnesty said it wrote to the

alleged to have been beaten on the soles of his feet and mistreated by prison guards. Amnesty said: "We have had no response from the Sandi authorities but we understand that they carried out an investigation into his treatment in that early period and that some prison guards have been punished."

Saudi authorities after his allegations of ill treatment

during the first 90 days of his

detention when he was being

held incommunicado. He was

In a letter dated May 31, Mr Carmichael wrote that his case was under review again after Mr Francis Pym, then Foreign Secretary, spoke to Saudi ministers. The Foreign and Commonwealth Office has confirmed that Mr Pym had asked Saudi ministers to look at Mr Carmichael's case and the embassy had followed up.

the initiative. An added misfortune is an injury to Mr Carmichael's

back. He said his spine was fractured; the Foreign and his back was damaged by a rough road over which he was being driven for a medical check-up. In a letter written in March

he wrote that only in the past four weeks had he been seen by two Western medical specialists. They started treat-

"In their detailed reports of March 1, 6 and 20 they refer to the brutal beatings, my seriously fractured spine and its permanent damage, and state my health is deteriorating to the level of acute neuromuscular problems - in other words, incipient paralysis.

They have prescribed treatment, diet, exercise, sun and fresh air, a little of which I Mr Carmichael wrote to me that the Foreign Office did little to safeguard the health

and interests of Britons. But

Mr Carmichael had suspended his hunger strike. The Foreign Office said the embassy had been given access to him in January, 1982, and he had been visited by consular officers on average once a month, British officials had asked the Saudi auth-

orities for a medical examin-

ation for him and he was to go

to hospital in the near future.

the office says that Mr Carmichael was last visited on

August 9 by Mr J. S. Gibson,

Third Secretary and Vice-Consul at the British Embassy

in Riyadh, when he learnt that

An official of the Saudi Arabian Embassy in London said Mr Carmichael was responsible for "huge debts". "He tried to escape from the country. He was personally responsible for the debts and

not the company. He will be allowed out as soon as he pays the money. Someone will have

Sales of home computers will double to £300m, market survey predicts

By Bill Johnstone, Electronics Correspondent

Buyers of home computers will spend nearly £300m this year and most of it in high street . shops, a market report pub-lished today by Mintel publications says.

The predicted sales are more than twice those of last year when purchasers spent £105m on buying home computers and another £32m on software (programs) and peripherals (disc/cassette machines).

The sales are expected to

keep rising. The researchers of the report conclude: "There will be a build-up of promotion and advertising in the autumn leading to heavy sales of home computers over Christmas, This will be followed by a boom in software in January and February, 1984, as the owners of the machines expand their

W. H. Smith still dominated the retailers of home computers, principally because it sells the cheap Sinclair products which account for two of every three home computer sales in Britain. According to Mintel, Commodore is in second place, when counting the number of ma-chines sold while the BBC Micro, Atari, and Dragon are in

Abortion is illegal in the republic under the Offences Against the Person Act, but a campaign by a strong conserva-tive and Roman Catholic pressure group to give the ban protection started move than two years ago and is now reaching its climax. The referendum will be on September 7. Debate has been

camps.
An estimated 5,000 Irish have abortious in England each year.
The Anti-amendment Cam

paign had the support yesterday of two Dail deputies (MPs) a protestant clergyman, and the master of one of the city's leading maternity hospitals,

leading materiaty nospitals. The group argues that the proposed amendment, which gives equal right to life to the mother and the foctus, could threaten medical practice, ban some contraceptions, and place restrictions on travel abroad for women of childbearing age on the ground that they might be seeking a termination. The measure was unecessary, the group said, and it failed to address itself to the 30 women a day who sought abortions in Ireland.

The group criticized the Roman Catholic Church for stigmatizing members who oppose the amendment with the assertion that they were proabortion and condemned priests who used their pulpits to

preach on a political matter.

The Prime Minister, Dr.

Garret FitzGerald, originally supported the amendment's wording but has since change his mind. In a recent speech he said that pregnant women whose lives were now saved by medical intervention could die if it was passed. He is due to make another speech later in the campaign.

The pro-amendment group argue that, without a constitutional ban, abortion legislation could be introduced in

the Irish Republic through the courts or the EEC.

With three weeks left to polling, the anti-amendment forces believe they can bridge the 8 per cent lead which the polls indicate the pro-amendment group now has in the electorate.

Whitehall brief

Backbencher power poised for renaissance

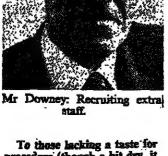

When political historians start sorting out the meaning of the first Thatcher adminis tration, they will discover at least one cheering anomaly in the general story of conviction politics and growing polariza-tion within and between the

The years 1979-83 already stand out in terms of parliamentary procedure as an era of trans-party alliance, consensus and reform. The period began with Mr Norman St John-Stevas, Conservative MP for Chelmsford as Leader of the House, establishing 14 new select committees to monitor Whitehall departments.

It ended with Mr St John-Stevas as a backbencher seeing his private member's Bill turned into the National Audit Act, 1983, in the dying hours of the Parliament. Son who were crucial to the renaissance of backbench power were victims of the boundary commissioners or the Conservative deluge.

Others remain consolidate the gains. One of their number, Mr Robert Sheldon, abour MP for Ashton-under-Lyne, is the new chairman of the Public Accounts Com-mittee (PAC), the oldest watchdog of them all, tracing its origins to 1366, whose influence should be given a substantial boost by the National Audit Act, when it

ler to pursue value-for-money investigations in addition to propriety audits is to be established in law.

Potentially, those change represent a shift in power from appointed people (Whitehall officials) to elected people (backbench MPs). But a statute is a licence for reform, it does not guarantee change.

The job of turning new powers into achievement falls on Mr Sheldon and Mr Gordon Downey, the comptroller, The pair worked together in the Treasury in the late 1970s, Mr Sheldon as Financial Secretary and Mr Downey as a deputy secretary on the public spending side.

They get on very well and the signs are that both are busy planning to give the National Audit Act some clost. Mr Downey is seeking extra staff. His department has been growing at 5 per cent 2 year since 1979 and will continue to do so until 1987. This year for the first time he is having difficulty in attracting the 60 new people he needs for three

second.

The United States maintains the southern flank: about 6,000 soldiers as against 240,000 on

Among the many problems are the extremely difficult relations between Greece and Turkey which make it almost impossible to plan coordinated land defensive operations.

This could be critical in the event of a serious East-West confrontation in the Mediterranean. One of the obvious key objectives of the Warsaw Pact would be to try to seize the Dardanelles by means of an attack through north-east Greece and Turkish Thrace, and thus open the Mediterranean to the Soviet Black Sea fleet. In present circumstances it is doubtful if such an attack

could be resisted for long.

The southern flank is now

But it will remain far behind the central front in terms of Nato's priorities. A sudden blow against an unguarded central front could destroy Nato in a couple of weeks. declaration of martial law in He comes to Poland only

weeks after General Jaruzelski abandoned martial law. During the 19 months of military rule no Warsaw Pact leader visited Warsaw although General Jaruzelski and other Polish Politburo members travelled throughout the Communist alliance, making reasssuring noises and explaining the reasons for declaring martial law.
The Polish Government was

convinced that the papal visit had stamped Poland with the seal of "normality". The country had returned to the international fold and could be treated by the West as an equal partner. But the key to mending fences with the West is to consolidate Poland's position in the Warsaw Pact. Herr Honecker's visit, which will undoubtedly be followed by a string of other meetings with Eastern block leaders, is the first big step towards this aim.

December 1981. Martial law was regarded initially with suspicion, as an unprecedented device that seemed to underline

the weakness rather than the strength of the Communist Herr Honecker's talks with General Jaruzelski are thought likely to concentrate on foreign policy. Both countries agreed for example that new American missiles stationed in the West should be met with an "appropriate response" - that is, in all probability, the stationing of

Most of the the outstanding bilateral issues between East Germany and Poland, example, the balance of trade, Poland's neighbours disliked and energy supplies, are being Solidarity. They feared that the settled at lower levels

Zimbabwe helps its stricken farmers

From Stephen Taylor

Faced with depleted food stocks in the wake of severe regional drought, the Zimbabwe Government has responded to calls by the farming community for reassurance and incentives with a range of price increases.

The advance minimums, which will apply to maize and other crops harvested next year, described by Senator Denis Norman, the Minister of Agriculture, as "a clear indisupport for the agricultural industry," and were welcomed as such by the Commercial Farmers' Union

Most important was the 16.6 per cent price increase, to \$Zim140 (£91) per tonne, for maize. After two drought years the country's staple diet has become a high-risk crop for farmers, more vulnerable than such alternatives as tobacco or cotton which have made satisfy-

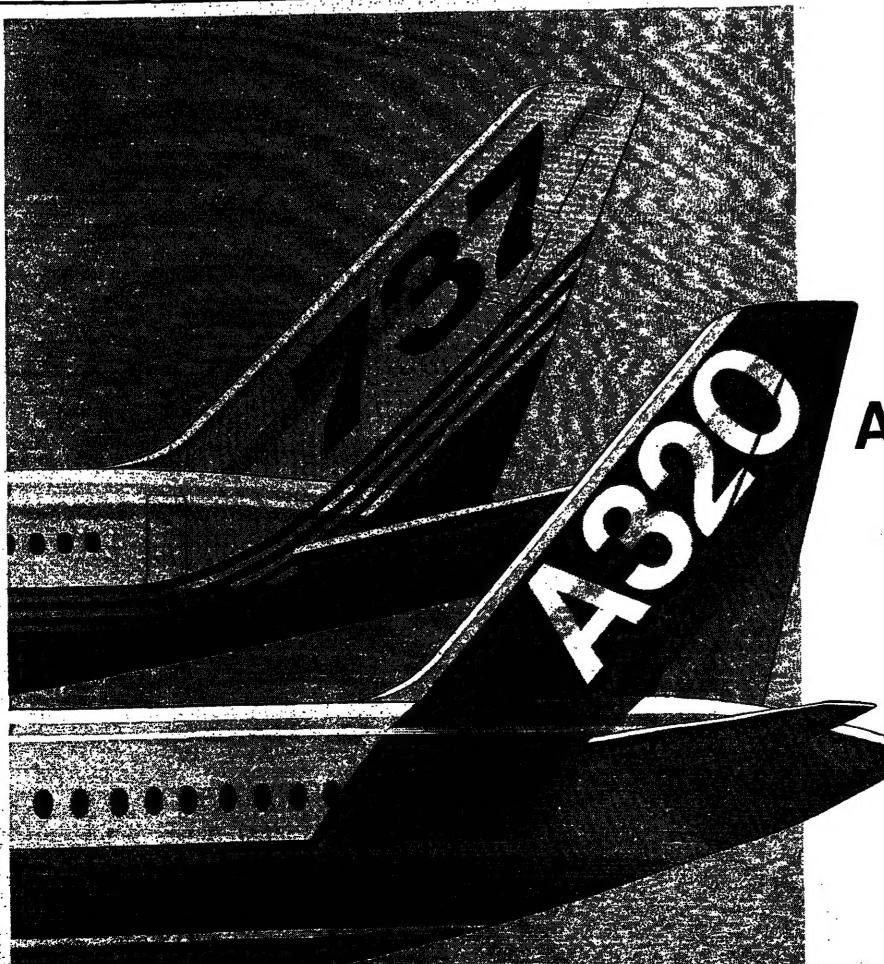

ing returns.
The record harvest of 1981 has been sold or consumed and by next April maize stocks will have run out. That, as was pointed out by the CFU in making its point, left precious little time in gettig the new crop in and required an incentive to farmers to plant early.

Although falling short of the \$Zim150 per tonne hoped for by the farmers, the new advance minimum should go some way to providing that encourage-ment. Mr John Laurie, the new president of the CFU, said the concept of advance prices we appreciated as it was in addition to the normal annual review scheduled early next year.

In an interview earlier this week Mr Laurie said "Farmers" morale has been badly undermined by the drought but given a fair price and fair weather I have no doubt that commercial agriculture will be able to meet the nation's expectations".

Central America policy differences remain wide after La Paz talks

From John Carlin, La Paz, Mexico

President Reagan and Presi- President Reagan said were not the results of Sunday's presidendent Miguel de la Madrid of Mexico ended a meeting in La Paz, northern Mexico, on Sunday evening with the dispreements remaining as marked as ever between their two countries on the question of Government Central America.

It was President de la Madrid who articulated the traditional foreign policy differences between the two neighbours. "No nation", he said, "can

impose its own image on others, nor believe that its own values and solutions are superior to others and therefore applicable to another nation."

It was a clear reference to American military intervention in Central America, intervention aimed at shaping the region's political picture.

Reiterating his country's commitment to "the principles of self-determination of peoples and of non-intervention", the Mexican President said that the world "would survive in peace plurality and unity in diversity were respected."

President de la Madrid made his statements in an address two hours before President Reagan's departure. The American President, less declamatory, less complex in his rhetoric, re-sponded with an address of his own before several hundred journalists in the La Paz town

In his address Mr Reagan also signalied "non-inter-vention" as crucial to solving the Central American crisis, but he added that non-intervention should include "ending support for subversive elements seeking to destabilize other countries".

in Toulouse. One of the day's few noisy incidents was a dispute between people carrying stretchers and pushing wheelchairs and sellers of a Catholic daily newspaper, La Croix. One of the lighter episodes was a rock and folk rights and peace.

Andropov insists on discipline From Richard Owen

President Andropov yester-

day hinted that further Soviet economic reforms were in the offing, but said they would be accompanied by a crackdown on "passivity and indiscipline", especially among the young.

Addressing party veterans at the Central Committee, Mr Andropov said Russia had reached the stage where it needed to "turn our entire huge economy into an umnter ruptedly functioning, well-adusted mechanism"

The speech confirmed that Mr Andropov intends to offer Russians an example of discipline and hard work by pursuing his campaign for efficiency at a time when previous Soviet leaders have taken a prolonged summer break. The speech follows the announcement of limited economic experiments and the promulgation of a new law tightening labour discipline.

Mr Andropov said Russia would have to "make up for what we have lost", and that this would mean changes in planning, management and the reminded his French listeners of economic mechanism. Such their good fortune in living in a changes were obligatory if Russia was to enter the next five-year plan in two years' time

Playing into the hands of those who pour scorn

Stephen Cox's Ascent (left) and Tondo Ascension, pepperino stone with stain and oil paint: "exquisite evocations of painted walk in classical ruins"

The Sculpture Show Hayward/Serpentine

Whether you regard The Sculpture Show as a triumph or a disaster may well depend on the order in which you see its sections. The superlatives which have been flying around in advance concerning its size are obviously justified; anything which can occupy the whole of the Hayward Gallery and the Serpentine Gallery, plus quite a bit of the concrete outside the former and the greensward outside the latter, has to be one of the biggest art shows staged in London in our time, and it is undoubtedly remarkable that it is devoted entirely to new sculpture, frequently by young and little-known artists. There can be nothing but admiration for the determination and flair with which the organizers have brought the 50 artists together, and thanks to the United Technologies Corporation for sponsoring the show to such an extent

How, then, can we look this gift horse in the mouth? Very easily - and not only because it is the duty of the critic to do just that. Of course it is my own taste I am putting on the line when I say that going round the Hayward Gallery half is a deeply dispiriting experience. But I do carnestly try to imagine the visitor who would be set ablaze with enthusiasm, and fail to come up with a convincing image. It is almost as though this part of the show has been designed deliberately to play into the hands of the person who automati-cally assumes that what is called

St John Passion

it has been enthralling to observe over the last decade or

so, how the textures, the rhetoric and indeed the mean-

ing of Bach's great choral works

have been gradually trans-formed by the use of period

instinments, old playing tech-niques and small vocal forces,

under such diverse conductors

as Roger Norrington, Paul Steinitz, John Eliot Gardiner

for here we were back with doubled wind and a solidly-sized choir. And, of course,

"authentic" sounds can never

fill an inauthentic bern like the

Albert Hall/Radio 3

sculpture today consists largely of random assemblages of garbage or, at best, of pieces of industrial metalpervasive impression is of litter: litter scattered over the floor, litter piled high; litter painted and lovingly displayed or litter left to fend for itself.

The sight is not, as Paul Temple used to say to Steve, a pretty one. And the depression induced by all this is if anything intensified by the frequent juxtaposition of finished works with project drawings, since almost in-variably when this is done the drawing is far superior to the final product. What is shown up is primarily shoddy or insufficient workmanship, and even with the most advanced of art it does matter whether the artist if he chooses not to stop at the concept merely, has the ability to realize that concept. Can anyone honestly look at the quite beautiful, magical drawings of, say, Carl Plickman or Michael Kenny, which are appreciably actuated by a sculptor's imagination, and then at the actual constructs of wood and metal they anticipate, and not feel a sharp sense of let-down?

When the works of the betterknown sculptors of the middle generation are not disappointing (like Tony Cragg's Drawn-on Objects, which are precisely that and lack the wit and charm of his coloured plastic assemblages), they tend to opt for respectability and duliness, like Nigel Hall's delicately coloured wall-pieces. which look like very large high-tech towel rails. Downstairs there are pleasing splashes of colour from Anish Kapoor (blue and yellow) and Jean-Luc Vilmouth (acid green), while in the brownish, dun-coloured range the odd fibrous constructions of Shirazeh Housiary and Judith Cowan have their eccentric charms.

But elsewhere in the Hayward one is increasingly overcome by a sense of deliberately scraping around for something to like. There are, to be fair, things one can respond to without arrière pensée, but they are few and far between. Stephen Cox contributes a couple of pieces along the same lines as his last show at Nigel Greenwood: exquisite evocations of painted walls in classical ruins by way of what seem to be fragmentary reconstructions in pain-ted stone. And Kenneth Draper, another sculptor who also shows related drawings and paintings, manages to match them with carious painted shapes, often mounted high up the wall, which make a lively, funny and sometimes slightly sinister impress while firmly refusing precise defi-As one leaves the Hayward -

supposing that is where you choose to start - questions hang heavy on the air. Why is there no real representational sculpture, which recreates something recognizable rather than merely presenting the thing itself? Can it be that, say, Malcolm Poynter and John Daviet are regarded as 100 established for inclusion? (Presumably not, or William Tucker and Richard Long, among others, would hardly be there.) Or do the organizers agree in despising altogether the sort of sculpture that the Nicholas Treadwell Gallery shows? Surely, like it or not, it is a vital part of the sculptural scene in Britain today,

while a lot of what is on rather faded and nasse. Arrival at the Serpentine does not

answer that particular question; but certainly the cloud of gloom immediately lifts. Here in the first room we have Michael Sandle and, though it is to be hoped that he will get tired of his tomb and catafalque shapes fairly soon now, the sheer proficiency and imaginative intensity of what he is doing bring a blessed relief. And there is more unashamed representation all round. Not of the superrealist kind, on the whole, but at least sculpture which is made to establish some kind of imaginative relationship with the visible world about us. Laura Ford's animal sculptures have an unaccustomed fierceness: this dog, this pig, these sea-slugs are emphatically not cute, not in any way anthropomorphized, and the formal gestures of the sculpture are both powerful and precise. Also inside are Paul de Monchaux's exquisitely finished small Portland stone abstractions, Richard Deacon's big, shining galvanized steel constructions like If the Shoe Fits (which does look vaguely like a giant shoe) and Two Can Play (two large skeletal globes almost intersecting), and Bill Culbert's Celebration, a table set with wine glasses in which the play of light is as important as the objects lit.
And outside there are more

pleasures. Perhaps the natural sur-roundings (if you call Kensington Gardens natural) enhance the effect of the sculpture. But I do not think it is just that. A large notice says firmly "Look, Touch, but do not Climb", and it is probably necessary, not in order to discourage vandals, but to

unwittingly destructive to carry over too much of the joie de vivre implicit in the sculptures into one's response to them. But otherwise, in more durable materials, might not Andy Frost's plywood Camel with the Hump be perfectly at home in an adventure playground? Possibly the appeal of Hilary Cartmell's odd tangled shapes, rearing out of the grass as though from the sea-sand, is a little more adult, but again the impulse to roll around with her Woman Under Sun or Shell Only Coming in on Waves is well-night irresistible (though it might be a bit like rolling around with the creature from the Black Lagoon).

In other words, if you end up at the Serpentine, you are ending up in the right place. Not only is there a certain sense of liberation coming from the South Bank's plains of cement, but, more to the point, the sculpture is in general better: more lively in its conception, more eloquent in its execution. It is not clear whether there is any sort of plan behind this disposition, apart from the need to get everything in in the most efficient way. But seen Hayward first, then Serpentine, the show not only gives a pretty fair panorama of British sculpture today, but also tells a story with a happy ending. If you want to be really depressed, try it the other way round,

The show runs until October 9. From today until October 1 there is a supplementary show at the AIR Gallery of drawings by eight of the lesser-known sculptors exhibited.

and he absent-mindedly pin-ched a line from Pilate. That might not have mattered had riched the texture, did I feel this

No doubts about the application of Anthony Powers in his Quintet, in which clarity of design (the piece alternates tonal centres of C sharp and G) and its very abstraction brought to mind Peter Maxwell Davies's recent work. Here there was an imagination sizzling with energy, and the composer is rightly unafraid of sounding derivative. The central scherzo was particularly exhilarating, and the brief final passacaglia showed admirable :economy as well as dramatic intensity.

Christoper Fox's d-amore had yet another approach to offer. Its first movement, from which all else sprang, was a jagged monody à la Messiaen, where the omnipresent viola was joined at various times by flute, clarinet and cello. The remainder offered an abundance of skills, whether in the way the pizzicato violin picked out the tune in the second movement, in the naturalistic murmurings and twitterings of the third, or in the ceremonial, chorale-like

Finally to Paul Robinson's The Geissler Monodies. Here The Geissler Monodies. Here again there were echoes of Maxwell Davies, albeit his earlier music, by virtue of the fact that the piece was a complex transformation of a pre-existent melody. In this case it was a song sung by the flagellants who travelled Europe trying to evade (and bence spreading) the Black Death. At times one felt the need for a times one felt the need for a ing, was a neat variation on the

When big became beautiful

In 1967, in the midst of a crisis, I had told our bank manager that Biba would one day be like Harrods. He gave me a long, puzzled look and said, "Do you really want that?" I was adamant.

Each day as I walked from the Church Street shop to the new site in Kensington High Street, I had examined the Derry and Toms department store building close by. It was so beautiful and so unappreciated. No one there had any respect for the building or its superb detail. It had been a star in its heyday but now, as it grew old and dusty, no one even gave it a glance. I began to daydream that one day we would bring it back to its original splendour.

Later, when the High Street shop was open, I noticed a tree on the roof of Derry and Toms, and realized there was a roof garden. One lunchtime in 1969, when my son Witold came to the shop with his nanny, the sun was shining and I said. "Let's go up and see this 'garden in the sky'." We walked over to the store, got into the rickety lift that went straight up to the roof, and stepped out into another world - a most beautiful, well-kept garden. Somebody clearly adored and cared for it, although it had few flowers.

We walked around the corner and there was another garden. Witold ran on to the little wooden bridge that crossed a narrow stream and we played Billy Goat Gruff for a while and then went on to examine the tatty-looking flamingoes. We felt a million miles away from the noisy street below. Looking over the balustrade we could see the whole skyline of London around us.

"Fitz, one day we must have this place," I said.

"Right, I'll get it for you," he replied. For the next two years I collected bits of furniture, cuttings of old carpets, mouldy old curtains with interesting weaves, and books and references about Derry and Toms. Any information that I might later need would be at my fingertips. I also collected people who would be useful for the big moment.

Anyone who was original was commissioned to do something specific for Biba. Myra Conin, for example, spent two years mixing up the basic colours for all sorts of designs. Sometimes she would spend days mixing a brown until it was the correct shade we needed for a carpet. Eventually one could describe a colour to her verbally and she would be able to put it down on paper. She spent months decorating the 1930s bust that was duplicated in glass fibre through-

out the big shop.

We felt shocked when we heard that our dream was going to be either shattered or forced upon us far earlier than we imagined. After all, we had only just moved to the High Street. By chance the head of the public relations agency we used knew Sir Hugh Fraser, the chairman of Derry and Toms, and heard that he was planning to sell. She organized a dinner party at her house in Windsor and invited Sir Hugh and us. It was a very high-powered party. Literally over the port and cigars Fitz managed to bring up the subject of Derry and Toms. Was Sir Hugh really selling? Sir Hugh was not sure. Would

Sir Hugh give us first option if he about the deals they had done. At the decided to sell? He might and he might end of it everyone said goodbye and not, but we left the party with the distinct impression that the building was available if we could raise the

The next step was to sell the idea to our partners. Fitz went to Bracknell, armed with reams of figures, to persuade the Dorothy Perkins board. We had agreed that come what may we were going to have that building, and if the answer was "no" from Bracknell we had flights booked the next day for New York, where we had connections who might back us. But Dorothy Perkins agreed.

'Sir Hugh tells me he has sold to you. I must have £400,000 in my hands by tonight'

The next stage was a formal lunch at Claridge's with Sir Hugh Fraser. David Roxburgh and John Ritblatt were there representing Dorothy Perkins. Ritblatt, small and sallow, was the head of a huge property company, British Land, who were property advisers to Dorothy Perkins, and took charge of the negotiations. The lunch dragged on with Rithlatt and Fraser telling stories news. Roxburgh was speechless but

nothing seemed to have been accomplished.

One Friday afternoon at about 4 clock Fitz heard a rumour that the building was about to be sold to someone else. He rang Roxburgh, who rang Ritblatt on another line, and both said there was no more that they could do. The deal was lost. Fitz was cursing Sir Hugh Fraser. "He bloody promised

"Ring him up," I suggested.
Sir Hugh was at his desk in Glasgow.
Fitz said, "I hear you are selling the

building."

"Yes," said Sir Hugh.

"You promised it to us," said Fitz.

"Have you got £3.9m?" Yes," said Fitz, who had no idea how far Dorothy Perkins might go.
"Stay by your phone," said Sir

Two minutes later a call came through to Fitz from the director in of the House of Fraser in London. It was very dramatic. "I can't talk loud," he said. "I have British Home Stores with me and I am about to sign with them. Sir Hugh tells me that he has sold to you. I must have

£400,000 in my hands by tonight." Fitz went a bit white but promised it would be with him in one and a half hours. He rang Roxburgh with the

passed it on to Ritblatt who, knowing a bargain when he saw one, arranged the transfer of the money within the hour.

One afternoon in the summer of 1972 Fitz came to my desk carrying a copy of the Evening Standard and looking very white. The headline on the City page carried the announcement that Dorothy Perkins had been taken over by British Land.

The shock was awful. It is every retailer's nightmare to be controlled by a property developer. The two have interests that are totally at loggerheads. The landlord must get the maximum rent while the shopkeeper must fight for every last penny. Furthermore, as we read the article, we saw that the control was passing to a board of directors composed of two accountants, a personnel manager and someone from an advertising agency. There was not one retailer among them. The situation was going to be impossible.

We both knew that we should resign peak: we would have been financially very well off, and we could have walked away and let them get on with it. On the other hand, Biba was our child and to desert her now was impossible. We knew that from that day forward we would have a fight to the end on our hands.

The first day of the building work was really impressive. Before we could

and bits of odd shopfitting left behind by Derry and Toms. We had more than 600 men in the building on that first day. Half of them appeared to have worked for us as some time or other in the past. Shouts of "Hello, Barbara" followed me as I walked about between the heaps of debris. As the rubbish was cleared it was wildly exhilarating to see revealed for the first time the beautiful Art Deco details of the building.

The only thing that was not functioning was the computer that was meant to tell us exactly where we were. Every evening Fitz would spend hours working out where our budget was overrunning and what we could reduce or eliminate if we were not to overspend. Every day the situation changed as unexpected complications and problems emerged.

At last the moment came when I had to start laying out the merchandise. Fitz had worked out a schedule floor by floor and department by department for when the shopfitting would be complete and the merchandise in the stock rooms. I had six weeks and the stock rooms. I had six weeks and over 100,000 square feet of shop, and I was the only person who could do it. As I had designed or bought each thing, I had a mental picture of how they would all work together, and it was impossible to transmit the overall impression to others.

The huge display units had arrived. They were reassembled in their final places and the finishing touches applied. As each department was finished, the manageresses and stock-room workers would assemble a cross section of all the stock around me and would start to work.

The store had gone quiet: the workmen had left and there was an enormous silence

The first department to be ready we called the Casbah. It was on the front corner of the ground floor and comprised all the things that we had picked up and seen on our travels from Turkey via Beirut to Morocco. At about 6.30 one night the store had gone quiet; the workmen had left and there was an enormous silence. Through the brown paper-covered windows I could hear the traffic and the life outside. There was a busking bagpiper playing outside Barker's, the store across the street. According to Fitz's schedule I only had until I am to complete this part, and after I had worked for two hours lifting heavy brass objects, I seemed to have been going backwards.

My back was aching, and I felt completely lost. I had been vaguely aware of two girls sitting near me, watching what I was doing. As I-wearily approached another large brass pot, one of them walked over and lifted it before I could get there. "Are you OK, Barbara?"

It was Aina, the leader of our shopassistants' union, sitting with her friend Gunda, waiting and hoping to be involved. By the time Fitz came back, all set to work through the night to help me, the job was done.

The next day I moved on to the shoe department, a huge mirrored unit right in the middle of the ground floor. We arrived as usual at 8 am and found to our amazement that the stock was already laid out waiting for us. Normally we would spend about an hour waiting for the hands to arrive to enable us to start. To find everything in place when we got there was a miracle. Far away in a corner on our newly installed escalator sat the six committee members of the union. looking rather sheepish. We went over and Fitz thanked them.

"Well," said Aina, with some contempt, "she can't do it by herself.

Not only had they helped but they had helped with thought and understanding. These girls, who had been with us for two or three years, dealing with customers under terrific pressure all day long, really did know what we were trying to do, sometimes more

On the last day everything was as nearly ready as we were going to get it. It was a Sunday and all our staff had been working non-stop 12 hours a day for three weeks. Every sweater was in its pigeonhole, every last fireproofed plastic grape was in place on the children's floor, shoes and room sets and men's suits were all in position. The food hall could only do their display at the last minute, for obvious reasons. The security guards were in their uniforms. The waiters had had endless hours of rehearsal.

I felt almost disappointed that the preparations were over. Fitz and I took a final walk through the six floors and 400,000 square feet of our total empire. I rummaged into stock rooms and staff rooms and offices, but I could find nothing wrong. We left well before midnight. It was

the first time we had been outside the Big Biba and could see it with all the lights blazing in the windows. I knew that it was not perfect, but I thought I had a lifetime to make it so.

TOMORROW: The pinstripe brigade moves in

moreover... Miles Kington

An old master by mail order

Have you had trouble with your pictures recently? Do they come back boring, dark and smudgy? That's because you haven't been using Moreover Picture Laboratories! Here's what just a few of our satisfied customers have to say:
"I'm absolutely delighted with your

service. I sent you an eighteenth-century landscape doubtfully attributed to the English school, and it came back definitely ascribed to Gainsborough, looking brighter than it had ever looked in its life. It is now worth over £50,000 instead of the £13 I paid for it. Well done!" "I had no idea until I sent you my old

Spanish portrait that it was by Gova. That is probably because I had never noticed the signature in the bottom corner before. Quite enestly. I don't think it was there before.

honestly. I don't think it was there hefore. To be absolutely honest, the signature used to read E. Alberto Sanchez. Thank you, thank you, for the transformation!"

"Recently I sent you a couple of obscure french prints. You never sent them back. Instead I received from you two dozen blank sheets of paper. Blank, that is except for the authentic signature of Pablo Picasso across the bottom. I am now having the sheets the bottom. I am now having the sheets filled up with Picasso drawings by the expert whose name you kindly gave me. Thank you a million times. PS: Keep the

Yes, we at Moreover Laboratories take your boring old pictures and turn them into something bright, new and fascinating and valuable! We have world-famous experts working day and night in our studios, authenticating your pictures, ascribing them to up-and-coming old masters or simply reassigning them to fashionable periods. We can arrange for them to be bought by a foreign buyer and then become the subject of a national whip-round. We can even clean them off and find a totally different and much more valuable painting underneath.

But surely, you may say, these are services provided by many more famous art and auction houses than ours. Well, yes and no. Yes, many international art dealers can take your painting and turn it into something quite different. But no, they cannot do it by return of post, as Moreover Studios can. We are the first genuine 24-hour picture service in the fine art world.

"I recently opened my stately home to the public for the first time, but I find that visitors are disappointed not to see portraits of my ancestors lining the grand staircase. I wonder if you could help me to put that right? I ought to add that I have only been in possession of the house for five years and that I can only trace my family back to my grandfather, who made the family fortune in vegetable oils."

Just one of the many letters we get from art-conscious millionaires with more money than pictures. In his case we were able to supply him with a complete set of family oils reaching back to 1606 by the weekend. In addition, we suggested a new feeture to him; a complete set of paintings. feature to him; a complete set of paintings of the butlers of the old house! This he accepted, and he reports that it has become a firm favourite with the public.

But our main work has always been the improvement of existing paintings.

There is no canvas or drawing, however boring or old, which cannot be improved out of recognition by the signature of an art expert, certifying it to be a Samuel Palmer or Carpaccio or indeed anyone you like. We can also arrange for:

 The addition of up to a dozen fruit to a pre-existing still life.

The purchase by a national gallery of

your hitherto unknown masterpiece.

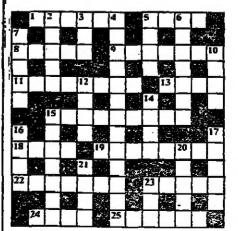

The transformation of an old book illustration into a new, glowing oil

Very soon, we hope to extend our operations on an international level so that we will be able to remove the painting of your choice from any Italian church, acquire objects from a current archaeological dig and obtain statuary which Melina Mercouri would rather have remaining in

Meanwhile, remember that Moreover Laboratories are open night and day. A thing of beauty is a joy for ever, from 24 hours after you send it to us! The service is not cheap, but we guarantee that your picture will quadruple in value withing a

Remember the name. Moreover. Modern art dealing at its finest.

Interferon kits

It is still too early to predict with confidence whether interferons will really find a place in the treatment of cancer, the common cold or more serious viral diseases but many trials are under way and even more are promised. One important aspect of these will be to determine for how long the interferon remains in the blood stream and the best doses to keep the level of interferon in the blood stream at its optimum

for effective therapy. The measurement of interferon levels has traditionally been cornplex, inaccurate and time-consuming. Two years ago a much more convenient method was devised in Cambridge. It took advantage of an experimentally produced "monoclonal" antibody against interferon.

Celltech. Britains' only sizable

biotechnology company, have just begun to sell the method in kit form so that anyone carrying out a trial of interferon should be able to monitor its blood level.

The kit could also be used to detect individuals who produce too little of their own interferon and so might benefit from more of it. The only snag is that the kit does not detect all of the types of interferon that the human body produces and which are being tested as drugs.

Space experiment

A mixture of pro-teins, some of them from blood, was separated far more efficiently on last month's space shuttle than in a comparable ground-

based experiment. FINDINGS

A series reporting on research BIOTECHNOLOGY the separated products is greater.

The sponsors are not prepared to reveal what they have in mind as commercial products of space biotechnology and many find it hard to believe in the economy of the process, whatever the product. Nevertheless, according to Science News, in 1985 it is planned to have a McDonnell Douglas engineer abroad a shuttle to separate enough of a substance of use in the treatment of protein-deficiency disease to put it through clinical trials.

Tough tobacco

It may seem curious that plant scientists are busy producing tobacco plants that are antibiotic resistant when tobacco farmers are not in the habit of spray-

ing their fields with antibiotics, but nothing frivolous is intended. It just so happens that a bacterial gene for antibiotic resistance is a convenient starting point from which to Polymer bonus develop new systems for introduc-ing valuable genes into plants.

The most advanced system for doing so is very cunning. It makes use of bacteria that infect wounds of certain broad-leaved plants and produce tumours near the wounds. In the process some of the bacterial grated into those of the plant. What company's aim is to find uses and a replace the tumour-causing bac-

For example, if a crop plant could be endowed with a gene for them, avoiding petrochemicals and resistance to weed killers, the crop pollution at the same time, but They argue that the extremely could be endowed with a gene for would suffer less when its fields are sprayed with the substance.

If any of that sounds easy, it is not. Nonetheless progress is being made steadily with model systems the volume of liquid have been chosen for their ease and con- to compete with existing techvenience. One such is the introduc-

into cells of tobacco plants, Success is measured by the ability of the cells to grow in the presence of the

Growth hormone It is down on the farm among uncomplaining animals that biotechnology is set to make many of its earliest impacts. Recently an American company matched an earlier European launch of a

vaccine against a diarrhoeal disease of young pigs. Genentech, one of the largest of the American companies, is more interested in growth hormone. It began by turning bacteria to the production of human growth hor-mone but has since worked its way down through cows, pigs and sheep to turkeys and chickens. The idea, in each case, is to supplement animal feed with growth hormone with the aim of producing a rapid rate in the animals with a faster

turnover for the farmer.

Meanwhile the use of human growth hormone, produced by bacteria, is already the subject of advanced clinical trials. Although there is evidence of one side effect, it should not be too long before an adequate supply of bacterially produced hormone does away with the current grishy extraction of it from the glands of human cadavers.

The day of the biodegradable plastic bottle came a step closer recently with the formation of the new company Marlborough biotechnologist plan to do is to market for the bacterially-produced polymer that has been developed by ICI, joint owner of the company.

The double bonus of the polymer, PHB, is that it is not only produced by bacteria but can be degraded by perhaps producing problems for storage. In practice, there is some way to go before the polymer can be made into plastic products and before the process is cheap enough

dressing was

inspired a myriad of dungarees and boiler suits, and on the other by the overwhelming heartiness of the health cult which kitted the nation out in interlock jogging Meanwhile, the prevailing mood of the times was morally recent Paris collections. based with commitment to

serious issues. Julie Christie, erstwhile incandescent fantasy girl, dressed unconcernedly and pop style. Guest-writer made public her allegiance to the Angela Neustatter looks Greenham Women. Jane Fonda, a reputation forged on giamorous roles, espoused important causes in sneakers, blue denims and nature's face. It was not the climate for glamour.

But with a change of decade, so there is a change of mood. Earnestness gives way to narcissism and a lust for frivolity and gloss. Joan Collins, high priestess of the quest for eternal glamour, is the new heroine and her tips on looking good command column inches once devoted to those serious issues. In America, we hear Cagney

and Lacey is banned because the two women detectives are "too butch"; on screen in Britain images of women striving to be emancipated are replaced by the smouldering Nastassia Kinski, while the heroine of Channel 4's intellectually motivated serial A Mar-ried Man is the archetypal mistress appearing in a confection of satin pyjamas and flame

red curls. Purely as an aesthetic reaction to the purposeful and

firmly on fashion, it can be seen that the return of glamour is logical, Fashion, more than any other art form, works in contrasting cycles. The mini skirt was followed by the maximent which, mintentionally, hippie styled Indian dresses and the cottage industry were succeeded by impeccable tailoring, lace, frills and demure prettiness gave way to clean cut

sporty gear.

But while glamour emerges periodically from designers' drawing boards as a fashion. theme, it represents more than a mode of dress. Glamour is a way of presentation, a frame of mind, a game of fantasy. It sets out to transcend reality.

The kind of clothing defined as glamorous sensual glossy, emphasizing the dynamism of the wearer, conspicuously different from anything worn for 2 mundane daily life, is based on the notion of creating something as far removed from nature as possible. Cosmetics have the same purpose for face and hair. Where other clothes may be worn to make us look pretty or elegant, glamorous wear is about creating an illusion, performing, playing with an image of sexual prowess and superiority; of wealth and

status; of entry to a lifestyle with limited membership. Bastet is a former model turned designer who owns three shops where the clothes seem almost to be a caricature of, glamour. There are see-through black lace sheaths; sequinned skin tight gowns with décolletage; strapless moulded bodices with draped skirts and an assortment of diaphanous

She explains: glamorous clothes because that is what interests and excites me.

Elegance I find boring, it touches no nerves. I believe clothes should be about causing reaction, about making "They make whoever wears them feel exceptional. We all

want to be exceptional, but few people have the confidence to dress for this. And the people who do not dare to experience the feeling of glamour are the ones who have a puritanical approach, who disapprove. They misunderstand glamour and believe it is about being obest and firsty it is about cheap and tarty. It is about living art, and being proud of It was, of course, the Holly-

wood stars of the 1930s era who established the notion of glamour, who instituted the idea of contrived, consumable style. At vast expense and the efforts of numerous wardrobe creators, make-up artists, cosmetic practitioners, the stars were made to represent a "reality" which the public could copy. When Joan Crawford, described by Penny Stallings writing about the real body shape, the ordinari-

peared in 10,000 copies of the dress she wore were sold.

It is easy to dismiss glamour as frivolous and irrelevant, yet looked at another way it is creative, artistic. To put together a lavish presentation, working on the basis of shape, colour and impact is little different to creating a picture and can be enjoyed more freely. Jeanette Kupfermann, a former starlet believes glamour

has a significant role in our lives. In her book The MsTaken Body (Robson Books) she talks of it as myth, as creating a "never never land" which allows women to fantasize, to escape difficult realities such as aging and death. She says it fulfils a need we have for a powerful pattern to life, explaining "It is ironic, but to be expected, that the only women who escape the glamour myth are those who live beneath the umbrella of an overeaching religious ideology or who have entered, as in madness, into a separate reality.

Yet it is the need women have to dress up to "discuss"

Judith Thurman, an Amerimagazine and describing an outfit of wide-shouldered suit, cut tight and structured, hair piled up beneath a veiled hat, high heels, says: "However you interpret the politics of these clothes one thing about them is certain; they will make women who wear them feel self-con-

They will be self conscious of the wind blowing the little hats off, of their stomach protruding from their sheath skirts, of their hobbled stride and their shaky balance. And the self-conscious woman, distracted by her moving parts, is a powerless woman. She can't compete, she can't work ef-

THE TIMES **DIARY**

Open invitation

It is 14 months since County and District Properties, at the behest of Kensington and Chelsea council, knocked a gaping hole in Kensing-ton Old Town Hall Local conservation groups are worried that company and council may now have found a way of finishing the job. The DoE granted the council permission to demolish the surviving building, but only when building contractors were signed for the "firm development scheme" proposed to replace it. Now County and District have filed a fresh application scheme (their fourth) with Kensington and Chelsea, and unlike its predecessors this one looks acceptable on planning grounds. But can the royal same conditions as were imposed on them by the Secretary of State? Having seen letters from the borough's chief executive to County and District urging them to wreak "the maximum possible damage" before a conservation order could be imposed. I think I can answer that.

British Rail is still striving for the take-off talked of after its improved financial results last week. On the 1500 InterCity 125 from Edinburgh on Saturday, all drinks in the buffet were being served in British Airways glasses. Even so the train was a few minutes late at King's Cross.

Not to be outdone by foreign competitors, British restaurateurs are fighting back with calinary innova-tions of their own, A cafe in Endell Street,

Covent Garden, tempted T. J. Bosman with "cheese and onion kishes", but even that was not as Alshes, but even that, was not at titilizing as the offer to Arthur Abeles, by the Red Lion, Ebury Street, of a "quick Lorraine". N. Hill fancied his find at the Queen's Head, Walton-on-the-Naze, rather less: "King Size Dog in French bread". After that he might have needed what Geoff Ellis saw in Ealing Broadway: "Gazlic coffee". Bernard Levin gives his verdict on the British 'Ring'

Driving straight to the heart of Wagner's heroic mystery

evening on Monday of last week, in the middle of Act II of Die Walkare, Hildegarde Behrens embarked upon the long dialogue in which she brings the tidings of death to the doomed hero, with the words "Siegmund, sech auf mich" ("Siegmund, look on me"). At that moment, a puff of white smoke was seen to emerge from the Festspielhaus chimney, and the vast throng on the terrace, many of whom had been there, patiently awaiting this moment, for anything up to 30 years, fell to their knees; some were openly weeping and a few of the more elderly ones, mostly French, expired on the spot, their faces wreathed in beatific smiles. Then the Cardinal-Secretary, Herr Wolfgang Wagner, stepped on to the balcony over the main entrance, gave the traditional blessing, Urbi et orbe, and pronounced the fateful words, so long unheard in the parts: "Habemus Brunnhildam", All we need now is a Wotan and a

Siegfried, and we shall have the

fixings of an uncommonly fine Ring.

I paused in Salzburg for a few days en route, to lay in some Mozart, like a man bastily putting on a thick pullover when the pilot announces that all the engines have failed and the aircraft is going to ditch in the sea, I was greeted, alas, by a sign that the world is coming to an end even more rapidly than I had supposed; a McDonald's in the Getreidegasse, almost bang opposite the front door of the Goldener Hirsch. No matter, there was also a Cosi Fan Tutte, lovingly and lingeringly conducted by Muti, with Bruscantini as Alfonso and the finest Mozart tenor singing I have ever heard in my life, from Francesco Araiza. Then I donned my sandals and my habit of coarse woollen cloth roughly tied with string, put a crust of bread and a few radishes in my acrip, took my staff in hand, and set off on my quinquennial pilgrimage to the holy place of Wagner, to sit in terrible darkness for 16 hours and there experience once more the effect of this unique music-drama, which bites its victims more deeply than any other work of art I know, and bites them, moreover, with teeth coated in a strange hallucinatory drug which induces a condition well described by the Ancient in Shaw's Back to Methuselah:

Infant! one moment of the ecstasy of life as we live it would strike

Why do we do it? Certainly not to enjoy the delights of Bayreuth, a notoriously undelightful town. (It, too, has a McDonald's, but here it is hardly out of place, for there has been a Parsifal Chemist's in the high street for at least a quarter of a century, and what I paid for a cummerbund would have kept Wagner in quilted silk dressing gowns for at least twice as long.) All and stay out at Pegnitz with the good Herr Pflaum, whose hotel, now a member of the Relais et Chateaux confraternity, is better run and more comfortable than ever (I have an apartment so enormous that in addition to an ordinary bathroom it sports a jacuzzi pool in solid onyx that takes me 10 minutes to wade across), with Brother Hermann in the kitchen muttering spells, to good effect, over the zicklein krusprig gebraten, and a young waitress the living image of Maggie Smith.

Why do we do it? Whatever the

Freia (Anita Soldh), on whose golden apples the gods live, is the giants' fee for building Valhalla: the Ring is her ransom

From where I stand, waiting for the fanfare to summon us back to our seats and wondering whether I have time for another brace of sausages before the interval ends, I can see, among the British contigent alone, a former Prime Minister, a Secretary to the Cabinet, a former Minister of the Arts, a former chairman of Covent Garden, a royal duke, a Warden of Wadham, a genius, a saviour of Venice, a young composer on his honeymoon, a director-general, and a man who claims to have acquired a ticket for Götterdammerung this very morning by mingling with the seething crowd outside the box office (sold out since last November) in search of what he called "the most obviously criminal face I could spot" and, when he spotted it, asking it out of the corner of his mouth whether it had one of sell at double the official price, being instantly rewarded for both his ingenuity and his perspicacity by discovering that he had hit, first go, upon the leading ticket-tout of the Bayreuth Festival, if not of all

But why do we do it? This year, at any rate, there is an extra answer. When Georg Solti and Peter Hall (they are known as "die Sirs" in the town) were engaged for the new Bayreuth Ring, they promised that they, together with Hall's chosen designer, William Dudley, would give Wagner everything he asks for

in the stage directions - settings, supernumaries and all. ("Even a bear?" I asked Sir Peter incredulously when I heard of this rash promise. "Even a bear", he replied with hardly a tremor in his voice. And there it is, in Act I of Siegfried, large, brown and furry, and plainly longing to growl.) Now a naturalistic Ring has been long overdue; I have not seen the door of Hunding's parlour fly open to admit the moonlight since the late 1940s, and I doubt if Fricka's chariot has been drawn by rams since Wagner died. Well, in this Ring the door flies open and the moonlight floods the stage as it floods the orchestra, and when Fricka arrives in the next Act she arrives, as Wagner specifies, in a chariot drawn by rams, and very

handsome black rams they are, too. That is by no means all. The staged, their trees like the real trees I see on my way in to Bayreuth on board Herr Pflaum's festival bus, and the sunlight, falling through their branches, perfectly convincing. as are most of the interiors - Mime's smithy, for instance, and Nibelheim, where Alberich has built himself a golden throne. There is a real rope for the Norus, too, real water for the Rhinemaidens (stark naked, incidentally, though one of them needs to take her bottom to the sunshine on some secluded beach, for at present it is disconcertingly paler than the rest of her) and a truly

science-fiction giant lobster. I swear that there are even real flames on the stage for the Immolation, in which case some of the Gibichungs milling around the pyre had better be firemen in disguise.

Nor is it just a matter of authentic props and scene-painting; the move-ment, especially for the Rhineas anything I have ever seen on an operatic stage, and the great set-pieces - notably the Entry into Valhalla and the Funeral March are replete with imagination and integrity, as indeed are many of the details, such as the dinosaur inte details, such as the dinosaur into which Alberich turns himself in the first transformation instead of the usual snake or dragon (inevitably upstaged later by the real dragon) and the murder of Fasolt by his brother, accomplished not with a club but with a chunk of the fata gold. The acting, it is true, is mostly no more than a sketch so far, and in some cases hardly even that, but the obvious intentions behind the sketch offer hope for a finished picture next year or the year after.

There are mistakes, of course, worst of them being Hall's decision to use a gauze, which fuzzes everything, particularly that which should not be fuzzed. Then again, the Valkyries collection of the bodies from the battlefield is a mess. and the Gibichung Hall, until the final scene, is horribly cramped, besides being carpeted, apparently, in bird-droppings.

Yet a Ring cannot be made out of anthenticity alone. Peter Hall's success lies in the way he has enabled us, by his fidelity to the wishes of a composer with a well-deserved reputation for knowing his own mind, to see both the drama and its meanings plain. Away with "interpretations" we have had these last years, mostly by salon-Marxists who have never read more than two paragraphs of Marx and understood neither of those. Away with the incessant hunger to epater les bourgeois, to draw parallels that are not parallel and conclusions that conclude nothing. Away with everything that blocks our path into the heart of Wagner's mystery with signposts that claim to be directing

Wagner's great tale of will and power, of love, renunciation and redemption, of sacrifice and selfsacrifice, will speak clearly enough to an audience when the director has the courage - as Hall has had - to let it do so, to seek the truth in the relationships, in the characters and their natures, in the symbolism, in the struggle of strength that cannot be waged through force ("Nichts durch Gewalt"), in the Shake-spearian understanding of the human heart that runs right through this most beroic of dramas. (No Shakespeare can succeed in the Ring, and Hall is one of our finest Shakespearian directors). The cine lies in the pattern of the leitmotifs: these will always guide us to the meanings great and small, and it is a measure of Hall's success that I cannot remember having seen or heard a Ring in which they made Wagner's points, with all their complexity and many-sidedness, in a manner at once so urgent, so clear and so illuminating.

(To be concluded tomorrow.)

answer, we are in good company.

Edward Schumacher on Chile's growing impatience with military rule

After the riots, **Pinochet** firing line

As September 11 and the tenth anniversary of Chile's military coup anniversary of Chile's military coup approaches, the junta appears to be bowing to popular pressure for a faster move towards democracy than so far promised. Twenty-four people died in riots during the latest protethy arries but the presented monthly protests, but they prompted a government reshuffle.

Among moves by President Pinochet was the appointment of Sergio Onofic Jarpa to the key Interior Ministry. Jarpa was not long in office before he was saying that the government would call a plebiscite on amending the constiution to speed up the congre

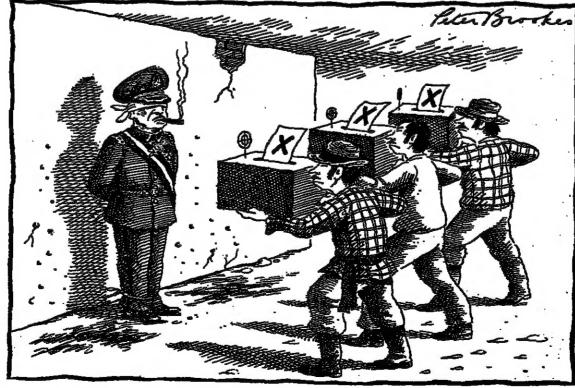

elections now scheduled for 1990. He did not say when the plebiscite or the elections might be held. But the statement, published last weekend, marked the first time a senior official has said that the government was open to amending the consti-tution, which was adopted in a

The constitution specifies that General Augusto Pinochet hold office until at least 1989 and that a plebiscite three years ago. congress be elected in 1990. Pinochet has repeatedly said he would not change the constitution or the timetable for elections.

In El Mercurio. Chile's conservarive and influential daily, Jarpa said: "I cannot say when, but we are going to have an elected congress before 1990." The Interior Minister said he had no doubt that an earlier election date would be approved in the plebiscite.

The latest demonstrations appeared to have died out by Saturday

The protests have been called PHS monthly for the past four months by opposition parties and unions. The

Democratic Alliance, a coalition of five centrist parties headed by the Christian Democrats, has said it will call a protest again next month. when Pinochet will celebrate the anniversary of his coup against Salvador Allende.

There was no immediate response from opposition leaders to Jarpa's remarks. It seemed unlikely, however, that they would be appeased. The Alliance a week ago demanded Pinochet's immediate resignation, formation of a provisional government and convening of a constituent assembly to draw a new constitution for submission at elections in 18

The Alliance claims that the 1980 constitution, though approved by nearly two-thirds of the voters, was unfairly presented. The government restricted opposition campaigning and no alternative was presented. The country was then in the midst of an economic boom. Now, it has been in recession for two years. Public opinion has turned strongly against Pinochet.

The Interior Minister's promises went beyond a political plan announced a week ago by Pinochet, who said the Council of State, a consultative body, would study only proposed laws such as reactivating panned political parties. Jarpa implied in the interview that he was speaking with the support of the General when he said that Pinochet had charged him to carry out the

political initiative. Jarpa was appointed Interior Minister last Wednesday. A former conservative senator and founder of the right-wing National Party, he was ambassador to Argentina for aimost eight years before taking the

Before taking the post, Jarpa demanded that Pinochet begin making transition steps to democracy, including early congressional elections, sources close to him said. The sources said they did not know what conditions, if any, were finally agreed to. But, they said, Jarpa supports Pinochet's remaining as president until 1989.

Jarpa's strategy, the sources say, is not to satisfy the opposition but to broaden the government's political base by attracting back conservatives who have abandoned Pinochet because of his refusal to begin, at the least, transitional steps to democracy. El Mercurio is among those calling for such steps.

Jarpa said opposition leaders would be invited to participate in the Council of State deliberations on the new political laws, but declined to specify how.
Gabriel Valdes, leader of the

Christian Democrats, said in an interview on Friday that Alliance leaders would not even talk to the government unless their parties were recognized and the talks were public. He said Jarpa closed the doors to talks when he suggested last week that many of the Alliance leaders were political exhibitionists.

Moreover, Valdes said, the protest movement has grown so large that the government's political openings

were too late to be effective. C New York Threes News Service, 1983 **Roger Scruton**

Foxtrotsky and a Minuet Tendency

Holidays, like birthdays, weddings country dancing did little to arrest and temporary farewells, are points the decline, and when finally the of transition and renewal. Hence they are occasions for dancing. Every summer people gather in of the ugly and the aged, it was Mediterranean resorts and, to the firmly established that dancing is an

Timorous at first, they steadily gain inspiration, and step out with unpractised movements and a kind of stumbling courtesy. By a miracle pre-established harmony they begin to move to a common pulse, and gradually their faces suffuse with smiles.

So it is, at least, in the south, where the habit of social dancing dancing which needs no lustful motive, which extends equally to the very old and the very young, which permits man to dance with man, woman with woman and child with child - has not yet disappeared.

In the north, however, dancing

has virtually ceased to exist as a social occasion. What passes for dancing is in fact a lonely parody of the sexual act, a formless vibrating of the body, accompanied by vacant expressions and wild movements of the hands and arms. The partici-pants do not touch but stand isolated in the solitude of their feelings, jerked by the music like puppets on a string. The dance relies for its excitement upon a constant heightening of the tension in this string, as lights flash and noises throb in a ghastly parody, also, of

battle.
The distance between a bop and a minuet reflects the immense dis-tance between cultures. In the first each dancer is free to stimulate himself in his preferred way, without reference to his nominal partner. Such a dance lends itself perfectly to the temper of a society that fears accomplishments, and which believes that each person has an equal right to consideration, regardless of his social competence or personal

The minuet, by contrast, is exclusive and disciplined. It is also social: each dancer must obey the formation, and from time to time change partners so as to dance with someone whom he did not choose. He must confine his seductive gestures to those little nuances which are all the more pleasurable for their resemblance to the innocent smiles and touches of the dance. The excitement lies in the coordinated movement, in which a shared skill provides the foundation for a common pleasure. Hence the minuet is a truly liberating dance, containing a vast store of social opportunity, freed from the imperatives of sexual desire.

To bop with someone to whom you are not attracted is a desultory experience, since the meaning of the act has been removed. It is scarcely surprising that the practice of asking different partners to dance has disappeared, and dancing itself

Viennese waitzes and polkas had dashed the legitimate expectations sound of violin, guitar, bouzouki or affair for the young counts alone electric organ, begin to shuffle off. The history of modern dancing it their coils.

Timorous at first, they steadily society of isolated couples cannot resist the fear of competence, which which have no recognizable steps, and the fear of social effection, which requires that bodies set in motion by music should not be

Perhaps, you may say. But why go on filling space that might have been devoted to the burning questions of politics? The answer is sample: if you do not understand dancing, then you will never understand politics Dancing is the paradigm of political fulfilment. People who step together in a dance are at one with themselves and their fellows. Their action is also response, and they move in a collective movement, with no purpose beyond the present pleasure. The uselessness of dancing is precisely why we value it. The person who joins the dance extinguishes purpose, and is content.

for the moment, to be. The meaning of the dance is the dance itself. the fundamental truth of condition. The purpose of life is life itself. This is the truth that Keats perceived in the figures of the Gretian urn, and which he summa-

It was also perceived by those who devised the old social dances. They saw that the revelation of the sublime purposelessoess of human existence must be carefully prepared, that it must be given a full and generous social context, freed from the tyranny of sexual excitement, and decked out in the costumes of peace. The dance then becomes a symbol of all that matters

in our political condition.

True politica maintains a social order in its own self-made equilibrium; it eschews those "final solutions" and "inversible shifts" with which fascists and socialists threaten all that is merely actual; it renounces the desire to establish the kingdom of heaven, and interferes in the rhytim of ordinary life only so as to teach the steps of the dance.

These steps must be complex and varied, so as to break down the aggressive isolation of the sexual bond, and to generate a public life that is something more than a congeries of private intimacies. The highest forms of politics exhibit the order and beauty of the minuer, the lowest forms resemble the disorderly solipsism of the jive. But even in its lowest form politics is to be preferred to that other thing which is not politics but war - the reckless pursuit of purpose, by those in the grip of an idea. Armed with that thought, I shall turn next week eligible. The revival of Scottish national politics.

Michael Clayton

Hunting down the elusive facts

The anti-hunters have started their season early this year, with a new note in the baying of the unattractive little pack run by the League

Against Cruel Sports.
The league's latest shrill proparanda line is that organized hunting n Britain cannot be trusted to stick to its own rules. As first reported in he Times, the league has revealed that it employs a leading hunt saboteur as a double agent to spy on

"Infiltrating" a hunt is about as difficult as infiltrating a soccer Cup Final crowd. Hunting is open to inspection by and bona fide representative of press or broadcasting. The most important messages hunting would like to convey to the general public are:

• The sport has its own strict rules. The ruling bodies are prepared to investigate serious allegations of rule-breaking.

Disciplinary action and sanctions can be taken against a master of hounds proved to have broken the rules.

Organized hunting is demon-

strably the most humane and effective method of necessary control of red deer on Exmoor, foxes in rural areas, hares and wild mink. Hunting's conservationist role in preserving habitats such as fox coverts, its encouragement of hedge-rows and its beneficial effect on social life in the country are not easily understood by many in the urban majority.

At a time when the technical means of communication have become so sophisticated there is a chasm of misunderstanding between the man who takes his under-exer-cised, over-fed dog to defecate in the park, and the man who regularly takes his fit, working dog to hunt a wild animal in its own environment. To seek deliberately to widen the

gap of understanding between the huge urban majority and the genuine rural minority can do nothing but harm. This is one of the most mischievous by-products of the line of attack so frequently adopted by the full-time propagadists who have now taken over the anti-hunting lobby.

Their use of the emotional loud pedal has been all too successful in producing legacy income to pay for their advertising campaigns - and to employ a hunt saboteur. How much better for wild life if the money from those who want to help animals were spent on such priorities as boosting the campaign to discourage illegal importation of animals which can so easily spread rabies.

Ficet Street to hawk "spy" pictures for the highest possible price, and promising more "shock horror revelations". Anyone with evidence that a hunt has broken the rules can present it to the sport's ruling bodies or seek legal redress. It is, for example, a criminal act to restrain a wild animal in a bag, then release it

for hounds to hunt. Under the long-established system of organized hunting, Britain has the largest fox population in Europe; the red deer herds on Exmoor flourish under selective culling by the hunts, with close seasons observed; and hares and mink abound in the

The alternative would be anarchy. control would be impossible for anyone to monitor - certainly not by "undercover agents". Posching of red deer on Exmoor is greatly discouraged by the existence of organized hunts, but when poaching does occur it produces deer horrendously wounded by shotguns, leading to slow, painful death.

There is more than a hint of desperation in the present anti-hunt-ing propaganda tactics because of the strong position of organized hunting. More people are hunting, and applying to take it up, than ever. More than 200,000 people hunt regularly in Britain, and throughout a year, about a million follow hounds. The recent Cobham Resource Consultants' survey of field sports showed an annual direct investment of £102m in hunting.

Many Britons clearly enjoy watching a well-bred pack of hounds tackling the difficult task of hunting a wild animal. Huntsmen's abilities are discussed in rural circles with all the enthusiasm accorded in cities to soccer players.

Disapproval of hunting by some is inevitable, and individual conscience about the taking of life must be respected. Militant, emotional propaganda seeking to destroy organized hunting without produc-ing other realistic forms of control and wild life conservation is another matter in a Britain which kills millions of animals each week and shows no national interest in adopting the extreme moral position of the vegetarian who will not wear animal skins.

its house in good order. No one will ever love the land and its wild life more than he who has had the privilege of experiencing the hunting field throughout the season. The author is editor of Horse and

ARMS AND MONEY

projections in defence spending inherited from Labour - Mr Pvm protesting. Mr John Nott then came in to apply these cuts in a way which aggravated their effect on service planning - and in particular on the Navy - by withholding a large part of the projected spending plan as a central reserve from which he hoped to meet particular difficulties caused by the application of cash limits.

That operation was paid for out of the Government's contingency reserve. The bill for replacements, which Mr Nott managed skilfully to win through in Cabinet, overrode Treasury misgivings. The Treasury also had to concede some year-toyear control on defence spending when it agreed, under the urgings of Sir Frank Cooper the last Permanent Secretary, that any Defence Ministry underspend could be rolled forward up to a maximum annual figure of £300 million.

It seemed that when Mr Heseltine took over in January the Defence Ministry could hope for a more settled future. That that is not to be the case became clear enough from the arbitrary and undebated manner in which the new Chancellor announced a £250 million cut in this year's estimates the day after Mr Heseltine, in all innocence, had introduced those estimates in his White Paper without ever mentioning the cut.

In political terms, Mr Lawson is correct to assume that he would be unwise to leave the defence budget unscathed when it is clear that the public. spending crisis will involve radical measures with, for instance, the possible de-indexation of unemployment pay and future thinking about the fundthat defence should take its place a speed and in a way which preserve a shop window, but Nato, will do so.

frustration.

preserving the basic structure within it to be even more inappropriate the smaller that

The question at issue is a commitment in Nato to increase the defence budget by 3 per cent per annum. That explicit obli-gation expires in 1985-86, but Nato ministers have resolved to try to extend it beyond. The Treasury argument is that Britain has more honourably discharged this commitment than many of her allies, and that anyway she pays more per head for defence than they do.

the lists is the Trident nuclear missile system. However, that is so fundamental to the Government's whole notion of deterrence that it seems an unlikely with Trident. The Trident system is one of the few strategic elements in a defence structure which is very vulnerable to the sudden whim of accountancy, as the Navy learnt to its cost under Mr Nott. It is a 40-year system. The original estimates of its cost have already been reduced now that it has been put in the Navy vote and its costs are responding to the benefits of long-term planning. Indeed the nuclear today costs less in real terms than it used to, solely on account of long production runs and a stable commitment to building

With Trident in the budget, it is argued that there are only two serious options left, both of them unacceptable. The first would be to continue to slice away at the existing defence structure, cuting of public welfare. It is right ting back on equipment, delaying production runs, drawing in the public spending queue; it down ammunition stocks. The is wrong that it should be done at effect of that would be to

defensive position, withdrawing our troops from the Continental while allowing the distortions line up, and preserving only a notional commitment to deploy them automatically on behalf of the Alliance. The full consequences of such a withdrawal would be incalculable within Nato, but would almost certainly lead to its ultimate collapse.

In fact there is a third way, but not in the time available to Mr Heseltine, if Mr Lawson's demands have to be met with decisions by November. The Chiefs of Staff have already carried out a review of Britain's likely military role out of the Nato area. The conclusions of a further review into the whole range of our commitments to the Nato alliance and possible changes in Alliance strategy which would permit alterations in the size and nature of our contributions, will not be ready

until the spring.
It is already clear in outline that financial pressures could be a useful catalyst for a much more radical approach to Nato strategy than any governments have hitherto permitted themselves. The Alliance line-up in Central Europe makes military nonsense. It is a tangled web of old political formulae summed up only too shrewdly by the witticism that Nato is intended to keep Americans in, Russians out and Germans down.

The principles on which Britain could base a policy of fundamental reform in Nato's strategy and defence administration will be explored in more detail tomorrow. As with its task in every field of domestic spending, this Government now has an opportunity to apply radical thinking to rigidities which have inhibited policy making for a generation. It may be more difficult to effect change in the diplomatic and military field than in social policy. But if this Government fails to take up the opportunity, no future British Government, and certainly no fellow member of

If alternative systems of treatment

College, Oxford

Facts come first

LETTERS TO THE EDITOR

From the President of the Royal the medical profession would not be College of Physicians

Sir, May I be permitted to make a few points in reply to your leader of doctors are "dazzled" by contem-August 10?

Of course, doctors make decisions about "access to health care". In our daily routine we regularly have to decide who to treat and how to treat; this is an integral part of our work. We are equipped to make these decisions through a long period of medical training and experience and we take into account such factors as the state of knowledge and understanding of a disease and its progress without treatment, our assessment of the patient's physical and mental condition, our awareness of the likely success of treatment, and of

side effects. Training in the management of health resources" would not equip us better to deal with these problems, but might introduce an economic factor that would further restrict the options open to us. Bearing in mind the important medical factors applying to each patient, could anyone other than a doctor make this choice?

Many doctors deplore the "expopential curve in the consumption of prescribed drugs". Partly this results from the public's expectation of treatment even for trivial complaints such as a cold; many patients regard themselves as inade treated unless they are given pills or medicines. Doctors should not take all the blame for society's obsession with pill-taking to cope with the ordinary stresses of life.

No-one who has studied the matter dispassionately would deny the tremendous contribution drug therapy has made (antibiotics, hormones, the control of Parkinsonism, etc). We are now left with a residue of diseases that remain hard to treat, but a policy of therapeutic nihilism would inhibit the exploratory use of drugs that has led recently to life-saving advances in the management of leuksemia and allied conditions and some forms of

Basic to all new treatment is the profession's acceptance of clinical trials. These are devised to test very strictly the ability of a new drug beneficially to influence the outcome of disease. The most common conclusion of such clinical trials is not that a new treatment should be adopted, but that it should be rejected. Many drugs "have to be taken off the market" because they have been found wanting. The profession, indeed the public, has the right to expect the same approach to alternative forms of

proved efficacious and not harmful,

Sir, Your leading article, "Facts come first" (August 9), should be

warmly welcomed by all who believe

reluctant to accept them.

It is time to dispel the myth that porary medicine and regard human beings as "groups of units". Medical schools have tried hard to balance the impressive advance of science by

increased teaching of the human

Good doctors - and I believe the overwhelming majority of doctors to be good - treat their patients as human beings and are aware of the importance of personal and emotional factors. Any denial of this would suggest that doctors are less than human in their reaction to

personal suffering.

Finally, it is not difficult to understand why patients with cancer seek alternative forms of treatment. The inevitability of a fatal illness is hard to accept. Doctors in general handle dying patients with great sympathy and understanding. To ease the pain of this difficult

terminal period, the profession has welcomed the establishment of hospices for the dying.

There is the world of difference between the provision of institutions that provide this sort of help and bstantiated claims that alternative forms of treatment can cure Cancer.

I, for one, would welcome the unequivocal demonstration that a malignant tumour has been cured by any form of alternative medicine Until this proof is available, such claims will not be taken seriously by the profession and should be disregarded by the public.

I apologise for writing at such length. The policies you advocate could lead to major and, I believe, damaging changes in the provision of health-care and warrant an even fuller rebuttal than this letter can hope to achieve. Yours faithfully, RAYMOND HOFFENBERG,

Royal College of Physicians, 11 St Andrews Place, Regents Park, NW1, August 12.

From Dr Malcolm Carruthers Sir, As founder member of the British Holistic Medical Association I must congratulate your paper on the signal service it has done this vital bridging operation between

orthodox and alternative medicine. One area not apparently covered however is the practical politics of putting these splendid ideas into practice. Financial resources for this are unlikely to be available from the over-stretched and generally unreceptive NHS, and even when applied by highly trained orthodox doctors, such treatment is seldom

part of the normal functions of government. There will often be

from outside government if fresh and radical policy ideas are to be

St Catherine's College,

PATRICK NAIRNE, Master,

Colourless cricket

From Mr J. L. I. Palmer

Yours etc.

From the Master of St Catherine's advantage, however, in an initiative

covered by private insurance

schemes. Unfortunately, in this country, good medicine is not yet recognized as potentially good business, and as such a growth industry worthy of private investment, as it is in the USA (New York Times, July 11,

1983). Yours faithfully, MALCOLM CARRUTHERS. Medical Director, Positive Health Centre, 15 Fitzroy Square, Wi. August 9.

From Dr A. R. Rogers Sir, It was the nationalisation of orthodox medicine in 1948 which produced some of the far reaching changes now observed in your recent series on alternative and holistic Once limited by state control,

medical enterprise has not been free

to respond to patient demand and has been fettered by government finance. Little wonder then that alternative medicine has flourished. The job security given to NHS doctors has lessened the bond

between the patient and the practitioner and has also resulted in ittle objection when patients seek therapy from alternative sources. This is why general practitioners and osteopaths and chiropractors appear to work more closely. Since alternative medicine flourishes in the market place none medicine

can deny it has a value. However, if general medicine were to be freed of its state constraints it would eventually overrun its competitors entirely on pure grounds of merit. Yours faithfully, ADRIAN ROGERS Victoria Park Road, St Leonards.

Exeter, August 10.

From Dr P. M. J. O'Brien Sir, The recent articles by Ruth West and Brian Inglis (August 8, 9, 10) followed by your report (August 11) of a "striking degree of interest in alternative methods of treatment among younger doctors", suggests that someone on the Times staff is taking too much ying with his yang and thinks he is writing for the alternative society who might normally expect to find such articles in another paper, such as the Guardian

Yours faithfully, P. M. J. O'BRIEN, Carirayne, Burley Road, Menston, Wost Yorkshire. August 11.

Future of Alliance

From Mr Alan Watson Sir. As the Liberal-Alliance candidate in what is now the most marginal seat in the South of England I have no doubt that future Alhance success depends on our ability to persuade voters that we are fit for government and as relevant to Britain's needs today as Labour was in 1945. We will not replace Labour as the alternative to the present Government if we passively wait upon the continuing collapse of that party. Labour's failure will not

guarantee our success and their

increasing lack of credibility does MOT MONUTE OUR OWN. The Alliance has to show that it is ready for power. To do this we must evidence coherence of policy, cohesion of organisation and the commitment of our united energies and resources. I cannot see how this will be achieved unless there is an effective coming together of the two parties; an organic merger willed from the grassroots and welcomed by the leadership, starting with the joint selection of candidates. Such a merger need not diminish the particular appeal of either the Liberal Party or the SDP but can

enhance the effectiveness of both.

It would be folly to preserve our differences in aspic in the belief that these will constitute our appeal under proportional representation. Electoral reform will only occur when the Alliance wins power. We will win power only when we show ourselves capable of government. This must involve offering electors throughout Britain a single, clear-cut alternative to voting Labour or

Yours faithfully, ALAN WATSON, Chairman. iberal Parliamentary Association, 2 Retreat Road, Richmond upon Thames, Surrey. July 28.

British Gas profits From Mr A. J. Lucking

Sir, Mr Jewers (August 5) com-mends the nationalised industries' current primitive system of "cocoa tin financing", under which today's users have to pay for the capital equipment needed tomorrow. A further consequence is that organizations such as British Gas and British Airports have to pass on unnecess-arily large tax bills, notably as the upvaluation of assets under the current cost system has raised depreciation charges dramatically

Even more disastrous than the impact on all of us as domestic consumers is the effect on industrial costs. Often our competitors in the US can obtain fuels and fuel-rich raw materials at lower prices and there is a strong case for transferring

production there. The sooner these key nationalised suppliers gain access to outside funds the better for Britain, though, as the reforms on British Airways have demonstrated, exposure to price competition is an essential

spur, too. Yours faithfully, A. J. LUCKING, Flat 20, Broad Court, Bow Street, WC2. August 6.

Dumping of waste in N Atlantic

From Mr David McTaggart Sir, Dr Roberts of the Nuclear Industry Radioactive Waste Executive (August 10) cannot continue to praise and defend a position adopted by this Government on radioactive waste dumping when other countries have abandoned the practice, when the London Dumping Convention itself requests contracting parties to view this method of disposal as the least desirable and when 19 nations, representing millions of people throughout the world, voted in favour of a suspension of the practice at the February meeting of that body.

The lone voice of the UK

pleading its innocence and injury is beginning to wear thin and to grate on the patience of other nations. Perhaps Dr Roberts needs remind-ing that the five Nordic nations have made it clear that the UK's position is not respected and that all that is asked of this country is that it abides by a democratically arrived-at decision.

The "careful international assessment" Dr Roberts refers to is full of assumptions and projections rather than hard facts and admits gaping holes in even the most contemporary of scientific information. It attacks the model upon which dumping has been based for

In the light of this and other information, not the least of which was the overwhelming vote in favour of a two-year suspension of dumping called for by the LDC, the National Union of Seamen, together with the TGWU and Asief, have demonstrated more sensitivity to international public opinion than this Government has any intention of doing and they must be praised for adopting a stance which has had financial disbenefits for some of their members. Yours faithfully,

DAVID McTAGGART, Chairman, Greenpeace International, 25 High Street, Lewes, Sussex.

From the Director-General of the General Council of British Shipping Sir, Dr Roberts (August 10) has explained authoritatively that there is no danger to sea or human life in dumping low-level radioactive waste in the Atlantic deeps in the manner employed by the Atomic Energy Authority.

All that the action of the National Union of Seamen, the Transport and General Workers' Union and the Association of Steam Locomotive Engineers and Firemen is achieving in "blacking" the specially converted ship concerned is loss of jobs and business for British seamen - both officers, who are still on board, and ratings - and dockers and railwaymen.

And this at a time when there; is seafarers and a fifth of our merchant fleet laid up. The vessel may now have to be sold abroad where it will be manned by officers and ratings of another country who will proceed to pick up the contracts for the disposal of this type of low-level waste from other ports.

The unions are unwilling even to discuss the matter with the Authority and the shipowners. Could they not reconsider that refusal in the light of Dr Roberts's letter?

Yours faithfully. W. P. SHOVELTON,

Director-General, General Council of British Shipping, 30-32 St Mary Axe, EC3.

Charity statistics From Mr E. W. I. Palamountain

Sir, Mr Brophy's letter (August 5) suggests at least one point of general interest and substance.

The reason why the total of charitable donations by companies has risen from the low level of the previous year are likely to remain obscure, although the redoubled efforts of charities which have lost public support is probably one of them. However that may be, it would be not merely unrealistic but wrong for charitable bodies to expect much higher levels of support from corporate donors.

The overriding obligation of any board of directors is to look after the interests of its shareholders, who have every right to require that any significant proportion of revenue allocated to charitible causes should be justified by reference to its anticipated effect on profitibilty. Many donations would satisfy this criterion, but no by means all.

The problem of the "non - qualifying" or marginal donations is considerably eased if the company (with the full approval of its shareholders) establishes a charitible trust - funded, let us say, out of the (gross) profits made in good years. Such action has, of course, taken by a number of well-known companies and one may hope that in a period of recovery their example might be followed by many

others. Yours faithfully. EDGAR PALAMOUNTAIN, Chairman. Wider Share Ownership Council, Juxon House, 94 St Paul's Churchyard, EC4.

Sea change From Mr Andrew Robertson

Sir, Mr Kilpatrick (August 6) regrets the replacement of sailors by crewmen, but of all the changes in terminology surely the most regrettable, not to say sinister, are those in sports reporting.

Teams have become squads (squad spirit?); strokes are now shots: centre forwards are strikers; and, worst of all, tie breaks are now sudden death play-offs. And we wonder at football hooliganism! Yours faithfully, ANDREW ROBERTSON, 11 Abercom Close, St John's Wood, NW8. August 6.

Soon after the Conservatives merely chips away at our little behind it. The other would came to power in 1979 they cut defences, both in the British be to embrace a Gaullist-style £250 million from the forward context and within Nato, by

structure becomes. Then came the Falklands.

> It is not easy to cut the defence budget in a hurry. The first item which will inevitably be put in source of economy. It would be unwise to start fiddling about submarine is one of the few major items of equipment which

up the fleet.

EATING PEOPLE IS WRONG Chad does not exist, according to cultivated savannah of the south.

M Pierre Messmer, a former Perhaps initially Mr Goukouni the civilian population and, in French prime minister. We all had the edge because of his know what he means. Chad has alliance with Vice-President the property with a massive interpretable of the civilian population and, in the property with a massive interpretable of the civilian population and the civilian population an

no "natural" identity, unity, or Kamougue - a Muslim, but from frontiers. Whoever undertakes to the south. If so, he lost it once he began to appear a Libyan puppet. Sensitive to this charge, after a year he himself asked for the withdrawal of Libyan troops. A force was put together by the Organization of African Unity to replace them, but it was not willing to fight for Mr Goukouni when Mr Habre's forces advanced from the Sudanese border in 1982.

ministers continued fighting Mr Habré benefited at that stage from weapons and supplies provided by Sudan - that is, indirectly at least by Egypt and The fighting went on until Colonel Gaddafi sent Libyan the United States. But as far as is known his little army was composed entirely of citizens of Chad. The war was still essentially a civil war, and Mr Habre won a convincing victory. That makes him as legitimate a president as Chad has had in recent years, or is likely to have in the next few. Mr Goukouni, despite all the advantages which may be supposed to accrue to an

incumbent ruler, lost. Mr Goukouni is presumably entitled, under the rules of this game which looks so futile to the spectator but is apparently enjoyed by the players, to attempt to turn the tables on Mr Habre using the same methods. What is more questionable is whether Colonel Gaddafi is entitled to help him do so by sending Libyan aircraft to carry

vention on the ground by his own army.

In so doing Colonel Gaddafi has changed the nature of the game - as President Mitterrand has implicitly recognized by sending French troops back to Chad, even if nominally as "instructors", for the first time since 1980. M Mitterrand's Government has a healthy distaste for intervention in the internal affairs of African countries. But this is no longer a mere internal affair. Chad has been invaded by Libya, and - according to the rules of the international community, codified in the UN Charter - is entitled to expect help.

So Chad does exist after all or if it does not, Colonel Gaddafi has somehow overlooked the fact. Why he should choose to invest such large military resources in an enterprise that has defeated so many others - and which, indeed, cost Libya itself dear only two years ago - is somewhat baffling. Presumably he hoped that the weakness and indecision of his opponents, in Africa and beyond, would allow him an easy victory which would tip the evenly balanced scale of African geopolitics in favour of his confused revolutionary designs. It would be better if Africans could prove him wrong on their own. But it is right that their European friends should be out intensive bombing of targets. ready to help.

ONE WAY TICKET

Defections from the Soviet bloc to the fore, making any decision are so common that only a an unsatisfactory moral comprorequest for political asylum with mise, In 1980 Walter Polovchak, an interesting new twist is likely aged 12, was granted political to make headlines. There is asylum to remain with foster something both ridiculous and sinister about reports from Washington of secret agents surrounding the Soviet Embassy or approaching a teenage boy at the airport to inquire if he wanted to defect.

They returned to the Soviet Union but continued to fight through the courts for a reversal of the decision. parental authority must be orities. The parents' case was weakened by the knowledge that Walter's life in the Soviet Union would have been wretched had he been forcibly returned after defecting. Adults who return in gested that she defect to the such circumstances are sencradle of socialism rather than tenced to long terms of return to the last bulwark of imprisonment for betraying the

The flow of defectors is oneway, in the West it is not normal to use the term "defector" for someone who decides to emigrate. Dozens of British citizens have worked in the Soviet Union sixteen, issues of individual for long periods - some translating propaganda materials hostile people in.

to their country's government but this does not lose them the right to return to Britain. No exit visa is required to leave Western democracies, but in violation of international agreements communist countries more often than not refuse permission to emigrate. Those granted exit visas cannot expect to return should life abroad prove a disappointment or even should they wish to come back on holiday.

The Kremlin considers defectors to be double traitors, having betrayed world socialism and their homeland. But whether for material reasons or to gain individual freedoms people continue to escape despite barbed wire, minefields, guard dogs and border troops. Seizing their opportunity during official trips abroad come soldiers, sailors, spies, musicians, mathematicians and most other professions from dancers to diplomats. One must remember that the Berlin wall, in all its spiteful horror, is maintained to keep

The process of Ministerial agreement on "a set of clear objectives", the commissioning of research leading to "the preparation of options", and full consultation

system in the world, classified 98 per cent grilse to 2 per cent full salmon at the peak of their recorded catches when they were over 150,000 fish

While the feeding grounds of the one-sea-winter fish, which are technically grouped under the term prilse, are still uncertain, the main grilse run from the Atlantic is well known. Since it approaches the Irish coast on a narrow span in both time and space, it is highly vulnerable.

It is probable that this same run feeds all the grilse rivers of Britain; therefore the ever-increasing attack upon the run at sea must affect them all. Forty miles of illegal monofilament nylon net have been seized by the fishery protection service of the Irish Republic in the present year alone.

It is however important to realise that the Irish drift-net fisheries do not exploit either spring salmon runs or those of autumn grilse because it is not economically profitable to do so, due to the relative paucity of fish in the open sea at those times. The short season from June to mid-August is

devastatingly rewarding.

Finally, let us realistically accept that it is politically impossible at the present time to eliminate legal drift and enclosed water netting. We should therefore press for statutory regulation of netting so that escapement will ensure that every river system receives the required stock for both sport and breeding purposes according to ratios agreed by the respective river authorities. Yours faithfully, DENIS MOORE, Pooks Hill, Four Marks,

Hampshire.

Sir, As a former Chairman of the Sir, Is that time-bonoured feature North-west Angling Federation of the cricket cap an endangered species and likely to become extinct? Ireland for more than a dozen years, I would be glad to give the fullest support to Sir George Kennard's plea (August 2) for action to reduce the scale of netting of Atlantic When amateurs played in the first-class game there was a tremendous variety in this form of headwear, consisting of university "blues" and the associated clubs, salmon. I would only differ from Sir George on a question of emphasis, for I believe that grilse, which constitute the majority of migratory Harlequins and Authentics from Oxford wth Quidnuncs and Crusaders from Cambridge. fish and provide most of the sport in Then there were caps of famous many of our rivers, are even more

national clubs such as I Zingari, Free Foresters and Incogniti mingling with those of the county amateur clubs. Players wearing the colours of Sussex Martlets, Hampshire Hogs and Somerset Stragglers, to name but three, often appeared in their county championship teams. All this gave cricket grounds an atmosphere of colour and gaiety which is sadly lacking to-day.
It could, of course, be argued that

official county caps such as the green ones of Leicestershire and Worcestershire, the maroon of Northamptonshire and the chocolate shade of Surrey do offer a little variety, but even these seem to be disappearing.

Perhaps, then, the day is not far off when we shall read in the sporting columns of our newspapers such announcements as: "After his recent successes for his county. Smith has won his first England helmet", or. "Although Jones has been on the staff for two seasons, he has only just been awarded his county floppy hat".

Yours faithfully, JOHN L. I. PALMER. Fosgrove Lodge, Poundisford, Taunton, Somerset.

Today is the Anniversary of the Birthday of The Princess Anne, Mrs Mark Phillips.

The Queen will attend a concert arranged by Motability at St James's Palace on December 14.

Forthcoming marriages

Mr P. D. Combes and Miles M. J. Little The engagement is announced between Peter Daniel, eldest son of Mr and Mrs K. Combes, of Dinton, Wiltshire, and Harriet Jane, youngest daughter of Mr and Mrs D. A. S. Little, of Teffont Magna,

Mr R. G. Macbeth and Mrs A. E. O. B. Pilkington-

The engagement is announced The engagement is announced between Ronald G. Macbeth of Cxford, and Audrey E. O. B. Pilkington-Jackson, widow of C. d'O. Pilkington-Jackson, ARSA, FRBS, FRSA, of Edinburgh. The marriage will take place quietly in September.

Mr P. T. Wright and Miss C. A. Dickens

The engagement is announced between Peter Tattersall, elder son of Mr and Mrs G. E. T. Wright, of Holton House, 47 Darmell Park Road, West Byfleet, Surrey, and Carol Ann, daughter of Mr and Mrs A. C. Dickens, of 19 Cherry Walk,

Marriages

Mr R. G. Floyd and Miss A. M. O. Parker A service of blessing was held on Friday August 12, after the marriage

of Mr Richard Gordon Floyd, son of Mr and Mrs R. E. Floyd, of Quesnel, British Colombia, Canada, and Mim Alison Mary Oxley Parker, elder daughter of Mr and Mrs C. W. O. Parker, of Faulkbourne Hall, Witham, Essex.

Mr N. C. D. Pownall and Miss P. E. D. Squarey

The marriage took place in Vancouver on August 5 of Mr Nicholas Pownall and Miss Philippa Squarey. The Rev P. Patterson officiated. A reception was held at honeymoon was spent on Salt Spring Island.

Station to be restored

A big restoration scheme began vesterday on Shrewsbury Station, Shropshire, one of the outstanding examples of Victorian railway

architecture in Britain. The station, built in 1848, is to get a new roof and two floors are being stripped because of dry rot. The work, costing £274,000, will last

fifteen months.

The station is a grade I listed building and grants for the work lave come from the Historic Buildings Council and Shrewsbury Borough Council

ested in the youth movement, Council on Empire Settlement. From 1942 to 1947 Wakefield was vice-president of the Royal Society of Arts. He was knighted in 1944 for public

services, and created a Baron in He married, in 1919, Rowena Doris, who died in 1981. They had three daughters.

GENERAL SIR ROBERT BRAY

General Sir Robert Bray, GBE, KCB, DSO, Deputy Supreme Commander of Allied Command Europe from 1967 to 1970, died in Wiltshire on

Angust 14.
Bray was born in 1908 in India, the son of Brigadier General R. N. Bray, and was educated at Gresham's School, Holt, and the Royal Military College, Sandhurst. He was commissioned in 1928 and Duke of Wellington's Regiment. He saw service on the North-West Frontier of India before the Second World War, and during the war he served in Norway, the Middle East and North-West Europe, for part of declared to be a pre-requisite for the time with the Parachute every successful general. It Regiment. He was awarded the DSO in 1944, and a bar to it in Sir Robert Bray and it was 1945, and was a temporary never easy to deflect him from a 1945, and was a temporary

brigadier in 1945. After attending the Imperial Defence College he was made BGS at HQ BAOR, and from promoted major-general on his Warfare at the War Office. In 1957 he became GOC 56th (London) Division (T.A.).

Two years later Bray went to Aden as Commander Land full his love of sailing.
Forces Arabian Peninsula, He also made his mark at which appointment was redesignated GOC Middle East Land Forces in 1960. It was during became the main British base respected at Nato for his on the western shores of the planning and reorganization. Johnston, and although the federal concept they sought to introduce did not endure his command in Aden stood him in good stead. He was promoted ieut-general on his return home in 1961 and made GOC-in-C Southern Command.

His time in Southern Command was cut short by the sudden illness of General Sir Harold Pyman, Commander-in-Europe, whom Bray was ap- 1965 to 1975.

pointed to succeed in Norway in November, 1963. He held this appointment for nearly four years until he went to Supreme Headquarters Allied Powers Europe (SHAPE) as Deputy Supreme Commander in February, 1967, having been pro-moted general in 1965. Here again he had an unusually long innings - almost four years -and was not relieved until November, 1970. He retired joined his family regiment, The from the Army in March, 1971.

"Bobbie" Bray was a massively-built man who personified that quality of robustness, mental and physical, which Lord Wavell, who possessed it in abundance himself, once required a great deal to shake course he had decided upon.

He commanded both a battalion and an infrantry brigade in action with distinc-1953-54 commanded an infantion, but it never fell to his lot to try brigade in Korea. of Science.

The two-day Shrewsbury Flower Show last week attracted 95,000 people, the highest number since its centenary year in 1974. Science report Riddle of the poisoned chickens

95,000 at show

By Pearce Wright, Science Editor The specific poison produced by the mould is still a

subject of argument among

experts, but the new findings conclude they are a family of agents called trichothecenes. It is unclear whether the toxin is produced by a mutant strain of moniliforme or whether it is formed, in the common strain but under special conditions. One of the arguments being made against the findings is that Fusarium moulds do not produce tricho-

thecenes in warm climates. The investigation has been a scientific minefield because of conflicting accounts in the literature of earlier research about the characteristics of trichothecenes. There are more than 50 compounds. One of their unusual qualities is that animals show no early warning signs of distress at continued low doses, but simply die when they cross the

lethal threshold. The new research findings come from a variety of sources. They include Dr Pat Hamilton, of the agriculture depart-

ment of the University of North Carolina; Dr Wanda Freeman, of a private agricultural testing laboratory, Woodson-Tenent, Tenness collaborative work between Dr Paul Nelson, of Pennsylvania State Univer-sity, and Dr W. F. O. Morasas in South Africa.

They have examined different aspects of corn blight and its impact on animals through contuminated feedstuffs. Dr Nelson isolated an unusual strain of moniliforme from Arizona samples and sent specimens to Dr Morasas, from which he obtained a toxin

that was lethal to duck chicks. Dr Hamilton believes the illness is a "new crop corn syndrome" when freshly harvested crops are converted into feeds for chicken and pigs. He says it has happened in at least 11 places: Alabama, Arizona, California, Georgia, New Mexico, New York, North and South Carolina. Virginia and Tennessee. Mexico. Source: Science, Vol 221, No 4610.

Bishop to retire next year

to retire at the end of February next year, it was announced yesterday.
The bishop, who is aged 65,

The Bishop of Lichfield, the Right Rev Kenneth Skelton, is

was at one time Rector of Walton, Liverpool, and from there became Bishop of Matabeleland, western Rhodesia, in 1962. It was during his time in office that Rhodesia declared UDI. Because of his stand against the regime he was labelled a communist and was watched closely by the police. He was appointed Bishop of Lichfield in 1975.

Panel clears UBM scheme

The Takeover Panel, the body which looks after share-holders' interests, has decided that the share option granted by UBM to four directors does not infringe the takeover rules. The options were granted to the UBM directors just a few days before Norcross announced it was making a £70m bid for the builders merchanting group which caused the share price to rise to 120p. The options were granted at 81p. The panel is satisfied that the directors acted in good faith when they asked shareholders to give them powers to take options at the annual meeting and they could not have known a bid was coming. • Davy McKee, the Sheffieldbased heavy engineering firm, has won a £70m contract which will give a new lease of life to a hot-strip mill at the British Steel Corporation's Port Talbot plan!

Mr Robert Holmes à Court profit of £6m.

BHP is serious.
It was announced in Perth just after

the close of trading on the Melbourne Stock Exchange yesterday. Mr Holmes à Court is offering BHP's 178,000 shareholders two shares worth A\$6 company called Wigmores for every one of BHP's 340 million shares.

In London the BHP share price jumped by 32p to 644p, equivalent to A\$10.90. There are 20,000 British

Amazement turned to bafflement in Australia when it was realized that Mr Holmes a Court only acquired control

franchise for Caterpillar earth moving equipment, on Friday, Wigmores supplies equipment to Mr Holmes à Court's Bell Group, his master company, and its capitalization is one per cent of that of BHP.

But Mr Holmes à Court said that the bid for BHP, which would be one of the world's biggest takeovers if successful, was unconditional, and he would buy any number of BHP shares from one to all the equity.

Caught completely wrongfooted, BHP could only profess ignorance. Sir James McNeill, the company's chair-

man, said: "I have had no communication from Wigmores and am at a loss to understand what their intentions may be."

While similarly ignorant, London analysts speculated that Mr Holmes à Court's aim was to drive up the BHP share, partly by making the bid, but also by eliciting a response from the management about the company's DEDSDECTS.

These are widely believed to be recovering, after a poor patch,

The bid has already been dismissed by two of the biggest shareholders in BHP.

Pioneering tradition of the biggest Australian

Mining is littered with Bro. remains resolutely Australian, ken Hills, but there is only one Broken Hill Proprietary. With 178,000 shareholders being sales last year of A\$4,789m (£2,887m), 72,000 employees, and a capitalization of A\$3,500m, BHP is far and away Australia's hierest countager. States and ICI to Britain.

But the company is most

But the company is most controversial in Australia for its Australians, as a mining comiron and steel interests. BHI pany in Victoria, and its has been and is the country' iron and steel interests. BHP only steel producer, but has Melbourne. It was unusual at a suffered heavily from foreign time when British influence in competition. For a while the

Australian commercial and steel division incurred large industrial life was so strong for losses. Last week, however, the an Australian company to government agreed to protecachieve such prominence. It tion Retail sales slip, but

The consumer boom may be However, the Government's levelling off although spending view is that the consumer boom in the shops is still well above is far from over, although the level of a year ago.

Provisional retail sale figures for July, published yesterday by the Department of Trade and Industry, show a drop in the index from 114.0 in June to 113.5 in July - the first monthly fall since April, 1982.

However, shop sales in the last three months were still 1.5 per cent higher than in the three previous months and 6 per cent up on the same period a year ago.
The Retail Consortium, trade

esociation for most of Britain's retailers, was surprised that the July figures showed a decline pointed to the volume of sales keeping up.
Taken with the poor June

figures for industrial production announced last week, the fall in retail sales may add to speculation that economic recovery is starting to falter.

spending in the shops may now be rising at a slower rate.

Exceptionally hot weather is thought to have affected business in the shops in July. Retailers are also worried that the boom could ease as the effects of increased mortgage rates bite. There is also a limit to how much additional credit will be taken up, retailers argue. Heavy buying on credit has helped to keep sales up.

largest credit information agen-cy says that when hire purchase controls were relaxed in July last year the volume of credit cations increased substantially, but July this year still saw an increase of 8.5 per cent. The home improvements market which normally peaks in May and June continued to be very buoyant. New car sales are expected to boost August credit spending, UAPT says.

vasion of privacy or a positive impediment to the development of the busitrend stays buoyant They may even be right to some extent, and some individuals will certainly

beard from other organizations at this stage in their development, and almost without exception the prophesies of doom and disaster were later seen to have bveen greatly overdone. That, however, does nothing at this stage to UAPT Infolink, Britain's

quieten the signs of revolt. Of course the protests may be nothing more sinister than human nature. It is always tempting to resist need for it has passed, and what better way to draw the sting of these proposals than to suggest that they should be less far-reaching,

more open image or deferred to some date further in the future, or not subject to independent veri-

> fication? But it must be said that giving in to any such mood would be to court disaster. Lloyd's has a long way to go to re-establish its reputation, and a register of interests is a necessary first step. But the disclosure must be full, not partial.

Turkish mystique at Harold Ingram

The two Turkish businessmen, Mr Mehmet Tecimer and Mr Yalcin Akcay, who have bought into Harold Ingram, appear to have acquired some the the mystique of Polly Pech's Mr Nadir, last year's spectacular stock market

No sooner do they buy a 75 per cent stake in cosmetic minnow Bellair at 8p share than the price rockets to 640p. Now they acquire 52 per cent of Harold Ingrams at 65p a share and that price soars to 323p.

The gentlemen concerned have disclosed little about themselves; their names do not appear in the Bellair offer document.

Apparently they have substantial interests in property and agricultural equipment trading in the Middle-East, but that is hearsay. Their only contact in London is through a firm

The reputable City firms advising these gentlemen would not have accepted them as clients if they were not thoroughly satisfied with their bona fides. But as it is a pity nevertheless that they have not advised their clients to be a little more forthcoming.

Even if they are reluctant at this stage to outline their plans for the future of the two companies, at least more detail could be supplied on their past performance. That way one could take a better guess at whether they have the required experience transform the companies and justify the current share price.

STEINBERG

BRITISH CLOTHING MANUFACTURER REPORTS RECORD PROFITS.

In the twelve months to 26th March 1983, the Group made pre-tax profits of £1.3 million from improved trading in both the Contract Manufacturing Group and the Branded Products Group.

The Contract Manufacturing Group supplies women's outerwear to Marks & Spencer p.l.c., and the Branded Products Group retails its products through the Alexon and Horrockses brands. During the year the Group acquired a 75 per cent interest in Agentborder Limited which has contributed £340,000 to pre-tax profits in four months.

To sustain this improved performance and achieve further growth, the Board have approved a Rights Issue to raise £4.1 million. This will be used for funding major capital expenditure programmes to increase production efficiency and capacity, and to develop a chain of Alexon retail shops.

demand for its services for the first time in three years and the virtual elimination of losses from its associates.

If the rate of improvement in results continues, the three -Ready Mixed Concrete, Equity Capital for Industry and Colguy Holdings - can look forward to a likely boost in the dividend at the year-end. Between them they own almost 60 per cent of

A big rise in trading profits from £28,000 to £248,000, and an interest payment of £78,000 against a debit of £52,000, is behind the recovery from the

An associate company's loss of £81,000 last time has been virtually eliminated. The improvement should continue throughout the second half. Cash received from RMC for Dredging's half-share in a sand and gravel company, will provide some interest earnings and accelerate recovery in the

The second half may also see a substantial reduction on a heavy tax bill of £350,000 on the profit of £392,000 realized from the disposal if negotiations with the Inland Revenue are

full-year to the end of next

Vibroplant

Year to 31.3.83 Pretax profit £550,958 (£353,775) Stated earnings 5.42p (12.61p) Turnover £16.4m (£11.5m) Net final dividend 4.6375p (9.275p) Share price 129p up 4p. Yield 8.0 Dividend payable 10.10.63

Vibroplant is lucky that its traditional plant hire business did so well last year. Without the more then double pretax porfits from the plant hire division the company's unfortunate diversification into the production of video juke boxes for pubs and clubs could easily have been calamitous.

In the year to March 31 V I Leisure, the video parent company, lost £1.2m. which takes the cost of the video venture to about £1.7m in two painful years. Despite the teething prob-

lems the Vibroplant board is confident that it can do well, although there is a tentative for sale" sign on it The business traded in the

black for the first time in the first quarter of the present financial year and it is hoped no more losses will be recorded.

The manufacturing problems associated with the jukbox have been resolved. Sales of the latest Mark II model are also going well, with about 300 placed in pubs and clubs in Britain this

es has also been sent to the US to test the market. The sticky problem of the Company's dependence on London & Liverpool Trust to distribute the sets in Britain has been partly overcome.

Vibroplant decided to change the arrangement where exclusive distribution rights for the video inkeboxes are given to one company, London & Liverpool. The group is also examining the benefits of such heavy reliance on one distribution method

Group pretax profits are up from £353,000 last year in 2550,000 this time. The plant hire division benefited from a spure in local authority and construction industry spending in the middle of last year. This helped swell pretax profits from the division from £805,999 to

About 13m was spent on new plant to keep investment ahead of depreciation so that the group is ready for any improve-

ment in demand. But the Vibroplant board remains cautious about the prospects of continuing growth plant hire until there is evidence of a share upturn in

construction activity.

The shares welcomed the profits news yesterday rising 4p to 129p, but there is much more to be done to reduce Vibroplant's dependence on one cyclical sector.

Suspension after 143p Ingram share rise

By Our Financial Staff The shares of Harold Ingram the textile group were suspended yesterday after a rise by

Last Thursday Mr Harold Ingiam, chairman and managing director, announced that he had sold his family's 52.26 per cent stake for 65p-a-share to

Wassicon Establishment. Wasskon is Liechtensteinregistered investment trading company owned by two Turkish businessmen, Mr Mehmet Tecimer and Mr Yakin Akcay. lt also has an investment in Bellair the cosmetic group.

Ingram shares were trading at the 60p level at the beginning of last week before the Wasskon deal was announced. Ingram has recently begun trading profitably after several years of ncreasing losses.

Mr Ingram and the directors of Wasskon were not available to comment yesterday Under takover regulations, Wasskon has to make all other share-holders the same 65p a-shareoffer and will be issuing an offer

document shortly.

Mr Ingram has just bought back 50,000 shares in the company at 165p a share.

Wasskon has a declared capital of SW Fr 30,000 (£9,500) and its owners describe themselves as import and export traders, specializing in agricultural equipment and property development. They claim extensive middle east interests.

Signal Control raises £51.9m

International Signal and Control, the US-bbased electronic weapons company, has raised £51.9m with its tender offer of 34.6 million shares. The striking price has been set at 150p against the minimum tender price of 125p. About 68 million shares of

this popular issue were tendered for and silocations will total about 46 per cent of ordinary applications and 62 per cent of preferential appliations for the 10 million shares reserved for existing holders of ISC.

The funds will be used for the acquisition of Marquardt, a California-based millile propulsion systems producer, a deal which was completed yesterday. The striking price compare with yesterday's market price of 158p after adjustment for the one-for-one strip issue which accompanied the offer for sale.

Share price 43p. up 1p Impala has struck to the niminal producer price of British Dredging's three big \$4754, an ounce, whereas it shareholders can rest a little Overseas operations hit

The new GKN is now benefiting from a gradual improvement in the British conomy. Automotive components sales have been helped by the increase in British car production, with further improvements yet to come from increased demand for cars with the new A registration. United States demand is picking up slightly behind the recovery recorded at home.

However, when reporting interim pretax profits of £38.1m for the first half of 1983. compared with £30.5m at the same stage last year, the company stressed that demand remains low from the commercial vehicle and agricultural vehicle industries. This reinforces the warning about the grim trading outlook given by Leyland Vehicles.

But the pace is picking up. GKN made £28m of its interim profits in the second quarter of the year and this level of profit should be sustained in the

Steel stockholding, forgings, ne fastener business and distribution - all fared better than a year ago.

Sir Trevor also confidently maintains that the general economic indicators in Britain West Germany and the United States remain encouraging and give confidence that today's modest recovery in activity will

The challenge now facing British managers is to go out and win markets, Sir Trevor says. "The private sector has got rid of a lot of its costs and has cope with recession is so much better. British management has managed to keep up its level of exports throughout the re-cession. For the first time in 20 a lot to offer now." The changing style is apparent at GKN. In the pre-recession days, years competitors are admiring Britain and saying how good it the company used to be formal in its planning producing volumes of information for an

Changing attitudes on how engineers are trained

The Engineering Council, set up by the Government in the wake of the Finniston report into the role of engineering in Britain's poor manufacturing performance, is supposed to have a wider role than the organization it is supplanting,

the Council of Engineering Institutions (CEI). Its brief is to change attitudes and stimulate practical alterations in incustry, acadaemia, the professional bodies within engineering and even in the City.

But, there is a danger, as it attempts to promote the cause of engineering, that, at best, the Council will achieve only a scattergun effect and, at worst

the Council's mettle has come with its policy statement on education and training.

It admits in advance that some industrialists are worried about what they regard as an mean that many employers do not went to see too many engineers with high academic qualifications emerging from the educational system with high-flown ideas of how much they should be paid or what industry should be doing.

The issue revolves sround the Council's ideas for "enhanced" "extended" full-time degree courses. Enhancementmeans tacking on to engineering courses those elements which have tended to be lacking in the United Kingdom, such as aspects of design and grounding in management and business methods. Emphasis on actual applications of engineering is seen as the

three at universities and polytechnics. They would either allow studies of greater depth in a particular sector of a multi-disciplinary approach across a number of engineering business skills

A design project would be a part of any extended course. The Council sets great store by design, thus bringing market-place considerations to the setting Britain on the road to a Technic culture of the kind which has so benefited countries like West Germany and

The Council's argument is it will get lost in 2 minama of generalities. The first real chance to assess that companies which have competed successfully are

those committed to constant innovation springing from market-led research and development, Typically, in such companies, engineers have made a key contribution to success, rising to a high management level in the process. Hence the Council reasons that we need an increase in the number of graduate engineers able to

PTRINCE.

The fear of elitism could be misplaced. The Council says at most a fifth of university students and a tenth of those at polytechnics should be on extended courses. A graduate under the Council's proposals, would become Master of Engineering (M.Eng).

From the "enhanced" threeyear courses, or their sandwich equivalent, seen as the route for production the main body of professional engineers, would emerge Bachelors of Engineering (B.Eng). Some-what hopefully seen as a cut

Extended corses are already being introduced at some universities with the support of the University Grants Committee. They account for about 5 per cent of present student engineers and this proportion should raise to 15 per cent when all the planned projects are fully operational. But although "enhanced", not all the courses yet go far enough in providing a broad base of engineering skills.
The Council's accreditation

procedures, now being brought in, will weed out those not ning up to scratch.

One current problem is a tendency for extended courses to be introduced at the expense of student numbers, so as to stay within spending con-straints. That can cut student: numbers by a quarter. The Council wants the numbers kept up, which means more money has to be found from somewhere or that its plans are unrealistic.

The council has been trying to find out what industry thinks about all this and discovered that employers favour either three-year, full time courses or preferably, their sandwich equivalent. So far Council has clearly

failed to sell its ideas on extended courses to large numbers of employees. It admits an important test is how far employers will be willing to offer the right career opportunities to graduates. There is no sign at present that attitudes have changed dramatically.

It also remains to be seen how far companies will involve themselvwa at university and polytechnic level in designing Derek Harris

SVENSKA CELLULOSA AKTIEBOLAGET SCA 9% Convertible Subordinated Bonds 1998 NOTICE TO BONDHOLDERS

Jonnol House, 10 Shepherd's Bush Road, London W6 7PJ

The Board of Directors of Svenska Cellulosa Aktiebolaget SCA have decided to submit to an Extraordinary General Meeting of shareholders to be held on September 1, 1983 proposals to (i) amend paragraph 5 of the Articles of Association of the company by an alteration of the nominal value of the shares of the company from Swedish Kronor 50 to Swedish Kronor 25 (sub-division) and (ii) to increase the share capital of company through a boams issue by converting to share capital of proceeds from Stansory reserves; whereby each holder of either A or B shares in the company – after the aforementioned sub-division – shall be entitlied to receive one boms share of a nominal value of Swedish Kronor 25 for each share of a nominal value of Swedish Kronor 25 previously held, such bonus share to be of the same class as the share previously held, such bonus share to be of the same class as the share previously held.

As a consequence of the proposed Bonus Issue a Closed Period in accordance with Condition 3 (h) (4) (B) of the Bonds will commence at 10.00 a.m. (Stockholm time) on August 22, 1983, and continue until the close of business on September 1st, 1983. Should the proposed Bonus Issue be approved by the Meeting, the Conversion Price of the Bonds will be subject to adjustment, in accordance with Condition 3 (g) (2) of the Bonds such adjustment will then take effect as from and including September 1 1983.

Should the proposed sub-division of the nominal value of the shares be approved by the Meeting, the Record Date for the sub-division will be September 30, 1983 and the consequent adjustment to the Conversion Price in accordance with Condition 3 (g) (1) of the Bonds will become effective at the commencement of business (Stockholm time) on October 3 1982

Should the Meeting accept these proposals, the Conversion Price applicable as from and including September 1, 1983, after adjustment for the Bonus Issue, will be published on September 12, 1983 at the latest, and the Conversion Price applicable as from and including October 3, 1983, after the sub-division of the nominal value of the shares, will be published on October 13, 1983 at the latest.

Sundsvall, August 1983. The Board of Directors,

Now Ibstock may fight takeover

By Jeremy Warner London Brick has built up a 4 per cent stake in Ibstock Johnsen, ahead of a Monopolies and Mergers Commission report due tomorrow, London Brick whether should be al-

lowed to renew its takeover bid The purchase of the share stake suggests that London Brick is confident of getting the go-ahead from Mr Cecil Parkinson Trade and industry Sec-retary, despite the obvious, dilution of competition in the brick industry which a merger

with Ibstock would cause. Ibstock directors agreed last December to a £27m offer from London Brick but trading prospects improved so dramati cally since them that they are now likely to oppose any renewd bid even at a Considerably higher level....

The City is expecting the Monopolies Commission also onopolies Commission also clear a £115m bid by Hepworth Ceramic for another maker, Streetley by the end of October. If this occurs it raises the possibility of a considerable proportion of British brick industry changing hands within six months.

Several stragegic shareholders have been built up in London Brick during the last four months and stockbroking analaysts expect both suspected stakeholders, Hanson Trust and Tarmac, to make some form of ntervention in any takeover battle that sevelpos between London Brick and Ibstock.

In the stock market, Ibstock shares are trading near their year's high of 125p in anticipation of the Commission giving London Brick the green

National Leisure buys zoo

Ge Albright & Wilson Ltd

1983 HALF YEAR RESULTS

The considerable improvement in profits in the first six months of 1983 reflected increased sales, further gains in manufacturing efficiency and benefits from the reduced value of sterling. The results were also affected by the sale of the Bush Boake Allen flavour and fragrance business in September 1982 and the inclusion from January 1983 of the TCE UK companies, mainly engaged in the manufacture of paper chemicals. Excluding Bush Boake Allen and TCE, sales would have risen in value by about 15% but beating.

profit would still have increased by just over 50%. Almost all sectors contributed to the improvement in results, with the largest gain being achieved in phosphates, though from a low base. Recession in the North American pulp and paper industry and low margins in UK fertilisers led to a reduced contribution from the two sectors concerned. Whilst the recovery in UK profits progressed, the overseas companies continued to provide the major part of group profits.

health by Geoffrey Ellis It is a familiar scene . . . a figure sits in front of a TV screen as rows of advancing aliens zap the defender, a gentle movement of the joystick empties the screen of the intergalactic horrors and a wry smile passes over the player's face. The player, however, is not a teenager, but 3

Playing

to better

middle aged man in a hospital wheelchair. He is the patient of an American doctor who is in the forefront of developing games for use in therapeutic sessions with brain damaged patients.

of the Brain Injury Rehabilitation unit of the Veterans' Administration Hospital in Palo Alto, California, first realised the value of games as a treatment for his patients in 1978 when the hospital was given an Atari video computer system to help pass the time for long stay cases. He saw that the skills required for the games eye-hand coordination, memory, attention span, timing and udgment - were exactly what he was trying to rekindle in his

He now regularly prescribes sessions of Breakout, a game in which the player demolishes a coloured brick wall with a bouncing ball. This helps brain stimulation. He cites one case of a middle-aged accident victim suffering with left-hemisphere brain damage that left him with slurred speech and faulty eyehand coordination. After three months of playing Breakout the patient's score more than doubled and eventually he was able to leave hospital and return ot

Following on from his work with the brain damaged, Dr Lynch is planning a long term research product with psychiatric cases, alcoholics and geriatrics, developing games for their particular needs.

FIRST

AND WINS

Dr William Lynch treats a patient using a home computer

Dr Robert Olton, a leading American psychologist, now on the staff of Atari as manager of behavioural research, tells of many other examples of the use of games as therapy. He cites the use for opthalmic cases where, to combat the common problem of "lazy eye" (Amblyopia), two test groups were set up. The first were given the standard treatment of eye exercises and corrective lenses. and the second were prescribed 30 minutes of playing Pac Man

Sitting in front of the screen was a perfect means of eye exercise which helped pull the eye back into its correct position. The group using conventional treatment lost interest in their exercises, but the video control group enthusi-astically continued their treatment to the end of the two week Games can also be used to

help burns victims. There is a great reluctance to exercise a painfully burnt hand, but when asked to operate a games joystick, performing exactly the same exercise that caused pain, the patient will happily move into sessions of Pac Man and Space Invaders.

COMPUTER BRIEFING

Call in the mouse

use a mouse to enter commands into their computer. Mouse technology is a method of communicating with a micro and does away with the head to tap messages in through the key board, writes len White. The hand-held mouse, so called because its cigarette-pack sized box and thin connecting wire give it the appearance of a robotic rodent, translates movement over a desk-top pad into movement of the screen cursor. Pointing to an onscreen character this way is much faster than using the direction arrows of the keyboard.

Once the cursor has located the correct screen character a button on the mouse is pressed to execute There are three click buttons on

the mouse. Pressing each one three times enables up to nine sequences of commands to be ered that would usually take up to 15 keyboard strokes.

The new mouse is from Mouse Systems in the US and is available from Data Design Techniques.

Users of the IBM PC can now use a mouse to enter commands into their computer. Mouse technology is a method of communicating with a micro and does away mouse. This tells the computer to expect instructions from the device expect instructions from the device rather than the keyboard.

For 2300 you get a mouse, software, power supply, and RS232 cable to connect the mouse.

Although the DDT mouse will connect to any other micro-com-puter, users will have to write their will accept mouse instructions.

non-typists because they don't have to fumble around with the keyboard or remember complex control sequences. You just have to click the correct button and it is just as if the sequence had been typed via the keyboard only it is much faster," said DOT product manager, Jenni Melsom.

"It eliminates laborious cureon

"It eliminates laborious cursor and keyboard control operations allowing the businessman to concentrate on actually using the computer rather than wasting time saming complex keyboard control DDT claims it is the first to offer a mouse that can be used with a multitude of programs such as VisiCalc and Wordstar. The Visi-Corp software company offers a mouse with its VisiOn program. But this will only work with that specific program which uses a technique called windowing. Here the mouse caused withousing, there are income is not used just to position a cursor or execute commands, it can also summon up "windows" of on-screen programs within a program.

New package

Tyet another networking package is now svalable to the business user. With more than 3,000 Triumph Adler Alphatronic installations in the UK, the new Micromite networking system strum four machines to communicate at a cost of around £5,000, which includes 10mb of hard clac.

☐ The new 96K version of Camputers Lyrux is now on sale through Leakys 50 "Micropoint" stores, and selling at £299. Owners of the smaller 48K version can now return their machines to the manufacturers to have them upgraded to the new standard at a cost of £90.

To enable computer novices to get the most from their machine Epson have just published the Easy Basic manual for the portable HX20. It covers most aspects of programming and gives sample routines and listings.

Siemens and Clympla have selected CP/M-86 operating systems and Digital Research graphics for their new 16 bit "people" range of personal computers. The contract is worth £250,000 to Digital Research.

of perks by Richard Sharpe

JOB SCENE

Money is not the only thing to motivate employees in the UK computer industry. The challenge of working on new projects is important, and so are the perks that go with the job. Surveys by the National Computing Centre reveal that perks make up as much as 16 per cent of the value of a salary

average is 10 per cent with a company car heading the list. While the company car is now quite common for UK management, the difference about the UK computer industry is that more and more middle managers are beginning to get one. A quarter of chief

in the industry. The overall

systems analysts, a fair pro-portion of chief programmers and one in five operations managers now get a car.
Paid health insurance is one of the newer perks on offer, along with share options. Share options are more common with US companies where the option is open to all employees, whatever grade. Digital Equipment, the US mini computer

maker, offers a special price on shares and the mood of its Reading headquarters can be judged by the share price posted in the cafeteria. Some of the perks including getting goods at discount, have another side to them. One is paid overtime. Another is the payment of a pension scheme -even though these need investi-

gating to find out if they are transferable, at what rate and whether they are better than commercial offerings. Computer staff at user sites and in the computer industry in general get slightly more leave than their counterparts in the same grades in the rest of UK industry. There are, according to the National Computing Centre's survey, regional vari-

ations such as the above average holidays offered for jobs in Scotland and Northern ireland. One thing that should not be left out, however, is the use of a microcomputer at home. Many employers encourage their staff particularly the program develhome so that they can continue with program writing.

As many micros also have games packages, presumably not all the time the micro is at home is spent in serious programming.

Putting ARC on the map

THE WEEK Clive Cookson

Datapoint, the Texan office automation company, last week announced the installation of its 5,000th ARC local area. network. At the same time the United Kingdom subsidiary sold the 200th ARC in-

The significance of those figures, according to Datapoint, is that they outsumber all competing local area networks (LANs) put together. There is some justice in the complaints of Datapoint executives that, ARC has not recieved the attention deserved by its success in the market, compared to the scores of competitors who may have sold a few networks each.

The LAN is a general method for connecting electronic equipment within an office so that users can exchange information and share resources such as printers and data files. Companies have come up with a bewildering variety of technical solutions to ensure that millions of bits of data per second can find their way to the correct destinations on the network: buses, rings and stars; broadhand and baseband; token passing and collision

The only serious attempt to impose an industry standard on the chaos is Ethernet, a network invented by Xerox and now the basis of an international standard supported by three dozen significant computer manufacturers, including Britain's ICL.

"Ethernet is busy trying to the up-standards; we are the working standard," says Alan Watson, marketing services manager of Datapoint (UK). His dismissve comment may be valid in the short

term. The customer appeal of ARC today is that it is tried and tested, with a track record unrivalled by Ether or any other

But the long run interests of the industry and its customers must lie in an open standard accepted by a large number of mountacturers. And so far Ethernet is the only candidate, whatever the technical merits of its baseband CSMA/CD (carrier sense multiple access with collision

detection) protocol. The promise of "open systems intercon-nection" through a standard LAN in that the user can choose the best pieces of epuipment from different suppliers and make them communicate as if they had all been made by the same company. But that advantage still lies in the fature.

The electronic connectors required to attach the various terminals to Ethernet still cost too much for a mass market, though the price is falling fast as new chips are developed for the purpose. Com only one manufacturer's products in a proprietary network like ARC is obviously simpler.

Since Datapoint offers a reasonable range of processors and peripherals, customers do not have to make a great sacrifice to buy ARC. The 200th UK customer, H&J Quick Group (a Ford dealer based in Manchester), is buying £240,000 of Datapoint hardware based on a 6600 file processor with 120 mb of disc storage at its central parts warehouse; five applications processors, 41 visual display screens, 160 system printers, two highspeed printers and 18 parts terminals will be connected to the ARC.

An example of a smaller ARC is Victoria Hospital, Blackpool, which has just two terminals now to handle patient statistics and will have five when complete. The hardware for a simple system like that can cost under £10,000.

Datapoint's high-flying image crashed last year when profits slumped to a mere \$2.6m and the first half of this year was no better, with a profit of \$2.3m on worldwide sales of \$266m. Datapoint shares are still only a third of their peak 18 months ago.

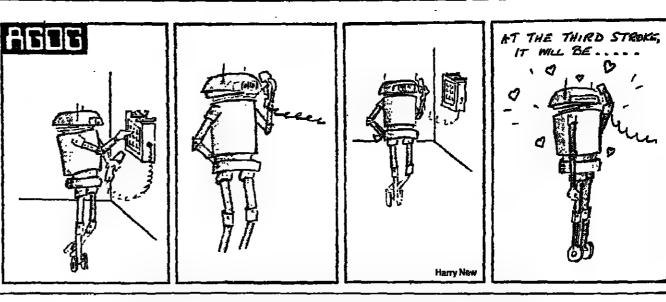

Part of the retrenchment has been to stop in-house development of Datapoint's ISX digital telephone exchange, which the company announced in 1981 as an integral part of its office automation strategy. The ISX ran into technical problems at its test sites and the project has been sold to Teknekron, a small American electronics company, for further development. (However Datapoint does have sole international marketing rights to Teknekros products).
Therefore Datapoint remains dependent

on ARC and its associated products. Its troubles last year have presumably delayed manufacturing outside the United States. But Mr Watson insists: "It is a stated aim of the corporation that we will manufacture in the UK in the not too distant future. It is part of our current five year plans."

Until Datoeint does establish a research, development or production presence here it is bound to be handicapped in the British market and particularly in the public sector. But that has not stopped the company selling a large ARC to the Ministry of Defence in

Five of the 11 word pro-

unbreakable.

The increasing use of data transmission and electronic mail has brought with it the necessity to protect communications from eavesdropping or, worse, from fraudulent distor-

Several computer programes have been developed which enable messages to be enciphered before transmission and deciphered on receipt. Since the programs themselves are usually commercially available and thus "public", the security of their programs is vested in a "key" (a string of alphabetical or other characters) known only to sender and recipient.

In the United States one such program, developed by IBM, has now been published by the National bureau of Standards as a Data Encryption Standard (DES). It requires a key of 56 bits (approximately ten alpha-numeric characters). Since the difficulty of breaking such codes increases with the length of the key, it is reported that IBM proposed a longer key, but agreed to reduce it after representations from National Security Agency.

Martin E. Hellman, a leading sources included many of the US cryptographer, believes that finest British (and, later, Amerithis was done to weaken the can) mathematicians using the standard so that the agency could break the key if required. Most cyphers can eventually be broken. The cryptographer's German key within 24 hours. It

makes "dual key control" possible and also means that no one person need ever know the whole key. But a much more interesting possibility lies in the "public key" systems being developed.

In these the key is also in two parts but, unlike the dual key method where both sending and receiving computers have to have access to both parts of the key, one part is used to "lock" the code and the other to "unlock" it. The recipient is provided with a program that enables him to generate both keys, but he alone needs to know the unlocking key.

The locking key may be sent to the sender over an insecure channel since, although in theory it would be mathema nically possible to derive the unlocking key from the locking one, it is computationally infeasible to do so.

It has even been suggested that the locking, or public, key could be published - for example, in a trade directory or telephone book. But since the key for a secure system tends to be rather long (upwards of 200 digits), this does not seem to be very practical. Public key systems require a lot of computing power and it may be

The games craze goes pop

By Frank Brown

You are a fighter pilot on a vital mission. Thousands of refugees Commodore is selling a arc besieged by an enemy bent million of its Model 64 them from enemy

offensive, and your job is to some 100,000 Spectrum madestroy the Exotron missile, chines a month. Few would survive its exploding mass of evil plasma. A continue for sometime and, as heavy responsibility, and it rests in the pop scene, fortunes will with the player of the latest be made by those who devise computer game, Zzoom, from top-selling games. The games Imagine Software of Liverpool.

Computer games are fast becoming a craze in Britain, and look as though they may take the place of pop records among the 14 to 24 age group, according to Imagine's general manager, Bruce Everiss.

"The record companies are experiencing a big drop in sales because more and more young people are becoming bored with pop and are turning to sames on home computers, he says. Indeed, many record companies are getting into computer games in order to survive". By computer games software will exceed those of pop records, he

His confidence stems from magine's own phenomenal growth. The company started trading in January this year, selling games on music-type cassettes at £5.50 each. Sales have mushroomed and turuover for the first year will be

"Initially the big market is the United States. But markets elsewhere are expanding rapidly, notably Japan and Austra-ua," he says.

The games boom is a reflection of the enormous sales of home computers costing less than £250. There are more than

million of these machines in Britain and the number is growing by thousands a week. genocide. You have to machines every three months: and, among numerous other international suppliers, Bri-tain's Sinclair is producing

Thus the games boom will

business already has its equiva- of Zzoom, John Gibson, is 36 lents of the top-twenty record and a former ceiling erector charts, and it seems that as in the pop scene, Liverpool is 64 playing a leading role.

Again like the pop scene, success does not depend on scademic qualifications. Aptitude for programming and imagination are what counts. Imagine's software development team are all self taught programmers. The team's manager, Eugene Evans, is 17, and is earning £35,000 a year in

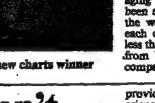

Image's best selling game is Arcadia which as its name implies, is similar to the one played in arcades. Written by one of Image's founders, 23year-old Dave Lawson, it is what's known as a "shoot up" game. The player has to shoot up masses of aliens in space There are different levels of difficulty, and the player has to salary and bonuses. The creator work his way up through the Everisa believes the computer

games boom has evolved from the growth of leisure time including the enforced leisure time of the unemployed. "Unlike pop records, games are participatory – like sports," he says. "The combination of colour, animation, sound and visual effects, can be used to create a world of adventures and challenges which test players' skills and stimulate their imagination." "Like pop records and tapes,

however, games must have imaginative and colourful covers to attract sales. Almost as much time is spent designing the covers, packaging and publicity material as devising

in managing its new found wealth. The group is already. diversifying by setting up subsidiary companies to provide various services. An advertising agency and a pack-aging company have already been established. Others are on the way. The aim is to make each one self-sufficient so that less than half its turnover comes from business with the parent

THE TIMES TUESDAY AUGUST 16 1983 Cricket: Gower the matchmaker, Coney the pacemaker and Fairbrother the pitchmaker supreme

England dormy one in spite of Coney's 68

LORB'S: England bear New: Howarth batted with two Who are the four best bowlers England duly won the third cheek, suffered in the nets an in the world? Being in the Test match, sponsored by Coruhill, when they bowled hour or so earlier. New Zealand out in their afternoon Crowe was caught at whether to include Willis second innings for 219 yester-cover point, sparring rather among the bowlers. He is a day, Just as New Zealand were inattentively at a long hop, and stdrong candidate on his form deserving winners at Headingly, Edgar cocked a flier into the this summer. Taylor, as he kept

Needing 347 to win, New like this. The rest of the Zealand did well to make as afternoon produced the liveliest many as they did after having been at one time 61 for four. For the fifth wicket Coney Coney, true to form, contri-buted a doughty 68. In the end the margin of England's victory was a few runs more than those made by Gower after he hadbeen dropped, when 21, on the. innings From that moment, however, England

were always in front. Howarth's decision to field was not, I think, wrong It anything, the pitch was less awkward yesterday than on the first day, partly because it had lost pace. But still the odd one, flew, specially when the ball was new and hard. In his last season as the groundsman at Lord's Jim Fairbrother, while not producing one of his special pitches, had provided the conditions for an interesting and enjoyable same.

New Zealand soon finished off England's second innings yesterday monrning. Within 20 minutes Cook had been well caught off Chatfield at mid-ou, Foster had skied Hadlee, also to mid-on, and Cowans had been caught at the wicket. In 3.3 overs with the new ball, England's last three wickets fell for five runs.

For the second time in the first three Tests Hadlee finished with eight wickets. When New Zealand went in the previous 18 wickets to fall had been worth only 255 runs between them. The chances of them making the highest score of the match to win it were remote.

By lunch they were 43 for. two. Wright and Howarth having been caught at the wicket, giving Taylor his 150th and 151st Test catches. Wright seemed surprised to be given out: Howarth walked barely a glance at the umpire. Wright had started promisingly,

When England won the last Test of the 1950-51 tour, their first victory over Australia since the War, there were sight of relief in Sydney and Melbourne, and Jack Fingleton.— I believe it was add:

"Thank heaven, now we can go back, the beauting for Australia."

The atmosphere at Lord's was much the same. Everyone was pleased, save the most ambiorn

last, had won at Headingley, but it was good to be able to cheer for

neland again, and, when we were villing patronize them a little. The

fifth-wicket stand, after New Zealand had been 61 for four, was

generously received, but there was a loud cheer when it ended.

The crowd was more concerned with winning than the loss of an extra day's play. This is all to the good, though I trust cricketing relations between England (more accurately. Britain) and New

TRENT BRIDGE: Hampshire, with

I dislike London in hot weather in

I distike London in hot weather in August, but if you have to be there, there is no doubt that Lord's is one of the pleasanter piaces. There is some, shade, and there was an occasional touch of breezs. It is much better, for instance, than Paddington Station, where the

bener, for instance, than

throes of choosing them for In the first 35 minutes of the Australia, I am wondering wicket at Lord's will be a banker. By tea Willis had also had Bracewell leg-before.

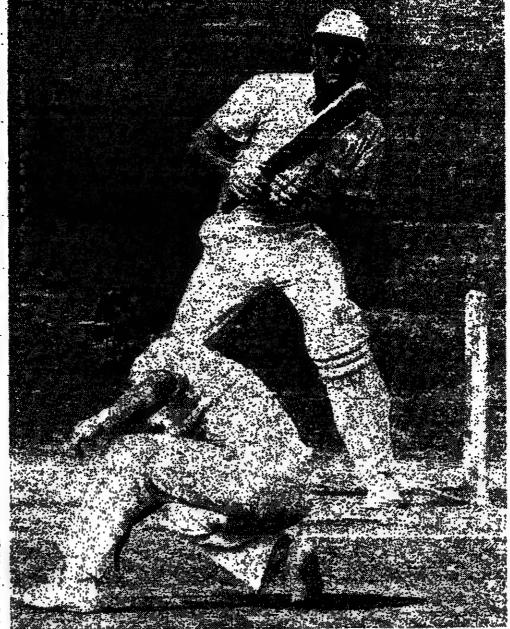

Coney continued to hook anything under-pitched with much aplomb to the Tavern boundary until, to the general delight, Foster trapped him at it Gatting at square leg having the chance to make amends. It was thoughtful and generous of Willis to bring Foster back for a last fling at taking his first Test

Although he had been kept waiting until the thirty seventh over of New Zealand's second innings before having a bowl, he was by no means a fish out of water. It was a reassuring victory for England, achieved soon after 5.00. For making 142 runs in his two innings - 45 more than Edgar, the next man Gower was made man of the

The total attendance was approximately 75,000. By way of comparison, 50,000 watched the three days of the Lord's Test between England and New Zealand in 1937. In 1978 when, as now, the match was played in August and lasted four days 55,334 went to see it. In 1973 a five-day game also attracted

What was so encouraging about the figures for the match just finsished was that they came at a time when, so soon after the World Cup, interest could be falling away. The weather and New Zealand's victory at Headingley have been

Perhaps the most remarkable figure of all, so far as Tests between England and Now Zealand are concerned, dates from 1949 when, on the second day of the match at Old Trafford, the gates were closed an hour before the start of play with 38,000 inside the ground. Today, with three times as many seasts, Old Trafford holds barely half as many people.

Smith ducks as Coney hits a six off Cowans

Emburey lines up a victory in sights of the big guns

the second time, Lancashire were rounded up for 193. In 55 minutes before the close Barlow and Slack stood firm in reducing their target

While it was pleasantly warm when sun broke through later on, it was overcast at the day's start and Old Trafford was a rather forbidding place as Downton, and Williams, walked out with Middlesex precariously placed at 89 for seven, 104 runs behind. Downton steered Allott's first ball

past gully to the boundary, and Middlesex must have thought that a Middlesex must have thought that a suitable and encouraging riposte—Allon's bouling had confounded their batsmen on the first day when he took five for 40. But after this, runs became a scarcity as Lancashire's bowlers, supported by a keen field, applied pressure. After the eighth wicket pair had added 15 precious runs, Downton fell to an excellent catch low down in the nully by Fowler. guily by Fowler.

That brought in Sykes, a raw recruit from the Lord's ground steff. Slightly built, Sykes showed plenty of courage as he passed an awesome test, staying the course of 14 overs and scoring four of 10 runs with Millione Burger Williams had williams. By now Williams had made 10, and as O'Shaughnessy ran in to bowl the fifty-seventh over. Williams doubled his score with a beautiful stroke, bringing him four runs to square leg, and another, an on drive, for four more.

O'Shaughnesy's revenge was sweet indeed because, by levelling Williams's middle stump, Middlesex were finally muted for 120 runs. That meant that when Fowler and

Keith Fletcher's autobiography is called Captain's Innings (Stanley Paul, 25,95). Another fired title, yet no worse perhaps than Beating the Bet, Simmer's View or Time to Declare, all similar revelations Declare, all similar what next? Figure Fool perhaps. The ghosts and their publishers must be running out of

options.

The book is, though, a good read, full of frank admissions and shrewd observations. The captain's innings has indeed been a long one-fletcher, now aged 39, is the longest-serving leader in county cricket, which is in marked countrast. to his startlingly brief spell in charge of England. Brief, and dull. The cricket on the tour of India in 1981-82 was not memorable, and that, coupled with Fletcher's lack of glamour, makes one wonder how many people outside of Essex will buy this book.

Fletcher explains his cricketing pilook by remarking that he is a isciple of lilingworth rather than Cowdrey, which perhaps explains also why the book contains many a moun. As is to be expected, most natable of these concerns his dismissed, over the telephone, from

Peter May, Fletcher's boyhood idol, was on the other end. To this day Fletcher remains embittered: especially so since he had turned down £45,000 to tour South Africa with Gooch's side in the hope, and indeed expectation, of remaining England captain, He has left no one in any doubt that if the offer were to come his way again, it would be

BOOK REVIEW

Red mists and moans

personally, in fact he was not told much. One suspects the real reason for his dismissal, particularly in light of May's views on discipline, and May's appreciation of Willis as a captain, which seems to be based largely on his behaviour, dated back to the Test in Bangalote. Flecher, feeling only one of his seven dismissals was justified, and seeing, as he puts it, "red mists," knocked off the bails in a sullen swipe at the stimuos.

The remainder of his book is a straightforward account of his career, and includes the now seemingly obligatory comments on the greatest of my time," and on the merits and defects of Boycott. There is a chapter of two devoted, quite rightly, to the rise of Essex. We learn of their amateurish approach of just two decades ago: the Gillette Cup was seen as an intrusion on days off, and taken barely half-heartedly, fielding practice was not even

There is an interesting account of the ill-fated MCC rour of Pakistan in 1969, and some horrifying tales of facing Liller and Thomson on under-prepared pitches Fletcher, 2 shy and decent man, could not bring riself to have a drink with them at

CLUB AND VILLAGE

Newcomers for final

. By Michael Berry The passage of Hastings and St Leonards Priory into the William Younger Cup final ensures a new winner of the national club championship for 1983. The Sussex side and Strewsbury will appear at Lord's for the first time on Saturday, August 27.

Hastings' semi-final win over Hastings' semi-final win over Southgate on Sunday over much to a fine innings from Keith Turk, a local school teacher. Colin Cook hit 51 as Southgate made 187 for nine, but Turk's first important contribution of the season in the competition produced an unbeaten 182 as Hastings way with six wickets 83 as Hastings won with six wickets and 17 balls in hand.

In contrast Troon strode into their fourth Whithread Village Trophy final with a 28-run victory over Langleybury. Langleybury had cause to rue the early reprieve of Scott Pedlar. Dropped at 17, he went on to make 65 of the home side's 171 for five and Langleybury

Peter Johns, veteran bowler, one of four players to have appeared in all three of their previous final triumphs, took five for 17 in 6.3 overs as Langleybury were bowled out for 143. Their opposition in the final will come from Quaridon, who denied Sessay another trip to Lord's with a two-wicket win off the fourth ball of the final over.

Davis at Glamorgan his best struggle

DERBY: Somerset, with eight Somerser, wath eight second-innings wickets in hand, are 186 runs ahead of Derbyshire.

A career-best bowling display of four for 34 by Mark Davis, aged 21, a left-arm seamer, put Somerset on course for victory against Derby-shire. Davis took the first three wickets without conceding a run in 11 balls. Derbyshire slumped to 199 all out on a good batting wicket.

Only Hampshire, with a valiant 74, and Hill, with 56, showed the necessary application in a fourthwicket stand of 125. Hampshire, who has been dogged by injuries, had to go to hospital after being struck on the hand by one of several nasty lifters from Carner. An X-ray test showed a badly bruised right Derbyshire's last seven wickets

surrendered for only 62 runs with the off-spinner, Lloyds, claiming three in three overs and, despite a brisk 28 from Tunnicliffe, Somerset claimed a first innines lead of 74. At the close they had extended that to 186 for the loss of Lloyds and SCHEDULT: First Invision, 273 (1 W Linyto St. R L Otto SO, T Gent St.: B Many & for 71).

Frant Desmond Stonekam, Desaville

Alfred Gilbert stood in for the injured Alain Lequeux on Mour-

The form of the Irish Derby diciates that Shareef Dancer will be extremely difficult to beat in the Benson and Hedge Gold Cup at York today and he is my selection. When he won in Ireland he had the French and English Derby winners directly behind him in second and third place. Not only that, but the margin of that victory was much more like five lengths than the three officially recorded.

In the meantime the form was given an emphatic boost by the fourth horse. Quilted, when he won the Princess of Wales's Stakes at Newmarket And now even that form looks gilt-edged thanks to the sterling deeds of Khairpour. John French, Awaasif and Morcon in the last

The word fromn Ireland is that Caerleon, who lost his two front shoes when he was unplaced in the King George VI and Queen Elizabeth Diamond Stakes at Ascot, will have his tongue tied down today and that he is expected to give Shareef Dancer a harder fight then he did at the Curragh where he was completely and utterly outpaced by Shareef Dancer However, Caerleon surely faces an

uphill struggle, even allowing for the fact that he won the French Derby against suspect stayers. He looked one paced in ireland whereas Shareef Dancer looked blessed with overdrive.

Along with countless others, I found that pace and that ability to quicken absolutely captivating and I expect it to be the key factor once again. Any misgivings about Shareef Dancer's well-being van-ished into thin air at Newmarket last Wednesday when he treated Electric and Karadar with the same sort of distain on the Limekilns as he had previously shown to Caerleon and Teenoso in Ireland.

The fly in the ointment could be Gorytus, especially if he turns out to be as good as many of us believed him to be just after he had trounced Salieri in the Acomb Stakes on this corresponding day last year. At Newbury last Friday, Saheri gave us a timely reminder that the form was good when he waltzed away with the Hunger-

Yet it is still stretching the imagination a bit far to picture Gorytus beating Shareef Dancer because nothing that he has achieved this year, or, more important, last year, compares with the sheer excellence that Shareef Dancer exuded in

By Michael Phillips, Racing Correspondent

Hot Touch, the conqueror of Guns Of Navarone in the Mecca-Dante Stakes over today's course and distance in May, will be trying to emulate his sire, Moulton, who won this race 10 years ago. Giving weight all round, Hot Touch took the honours if not the lion's share of the prize-money in

the Scottish Derby last month.

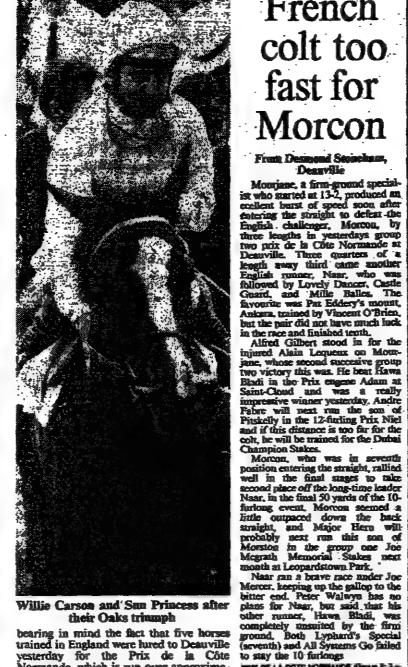

However, as there has never been all that much between Hot Touch and his frequent galloping companion Teenoso at home, it is difficult to envisage him coping now with Shareef Dancer in view of the fact that Teenoso was comprehensively outpaced by Shareef Dancer in the Irish Derby, Likewise, the Gordon Stakes winner, John French, appears to be held by my selection, especially if one takes a line through Quilted.

Electric won the Great Voltigeur Stakes at this meeting last year, but he has never given me the impression that his armoury harbours sufficient material to counter the sort of rapier-like thrust that Shareef Dancer is capable of George Robinson, our Newmarket correspondent, said yesterday that my contention was certainly borne out by their gallop against one another there last Wednesday when Shareef Dancer was in total command

Every bit as fascinating as the main race is the Yorkshire Oaks which features the first clash between the respective equine queens of England and Ireland, namely Sun Princess and Give Thanks. The latter has already won the Musidora Stakes at York this year and her trainer Jim Bolger knows precisely what is required now, having sent Condessa over from Ireland to accomplish a similar mission two years ago. But then, so too does Sun Princess's trainer Dick Hern, for he was responsible for Shoot A Line, the winner of the Yorkshire Oaks in 1980.

If the running of Acclimatize behind Sun Princess in the Oaks and her effort behind Give Thanks in the Lancashire Oaks is anything to go by, a victory for Sun Princess should be a formality now. Howgever, I am sure that it is not quite as simple as that. Arguably, though. Sun Princess has the greater speed and that could easily be the deciding factor on this

And so to the supporting cast. With the future in mind, it may well be worth the York committee's while to reconsider the conditions of the High Line Stakes.

Willie Carson and Sun Princess after their Oaks triumph

bearing in mind the fact that five horses trained in England were lured to Deauville yesterday for the Prix de la Côte Normande, which is run over approximately the same distance but more important, infinitely more valuable. The absence of such good horses inevitably disappoints our racing public who contribute a lot to the sport via the levy on

We could have done with the likes of yphard's Special, Morcon, Hawa Bladi, All Systems Go and Naar running for a race which is regarded as a consolation prize for those not deemed good enough to be going for the big race itself.

Victory scores and Australia's keel finds a new friend

After strong winds forced the metre design, in coming out on the cancellation of all racing off side of the Australians in the continuing argument over the equity of Australia's radical fin America's Cup challenger, scored an easy win over Canada I in the second tace of the semi fluid gives the yacht a 12-metre rating in an epright position as the rule requires, and that rule does not care or mention anything about the possible waristion when heeling,

Anstralia II.

The British 12-metre yacht, skippered by Lawrie Smith, won the start and pulled out an immessive 26 second lead by the first weather with the start and pulled out an immessive and pulled out an immessive forther weather weather with the first weather with the first weather with the first weather with the start weather with the start weather and the second test by the first weather three seconds on the spinnaker reach where the Canadians retired with rudder problems.

Twenty minutes before the start of the second match, between Alan Bond's Australia II and the Italian challenger, Azzurra, the Australians broke their boom but had a second spor fitted and their mainsail reset all within nine and a half minutes. The Australian yacht, skippered by John Bertrand, then went on to win

John Bermand, then went on to win the start and, reveiling in the light-siz knot hreeze, built up a Jania 20sec lead by the finish.

Writing an open letter to the New-York Yacht Club yesterday, Wolter you Hituchler, the naturalized Brazilian credited with introducing the Bermudan rig to yachting, followed the American designer, Colin Stephens, the father of 12-

George Turley and Mal Hughes, of Eldon Grove Harlepool, who are

world Soxing Connell's weber-weight championship, Colin Jones may now box for the rival World Boxing Association's version of the dile. Jones has boxed Milton McCrory twice for the American promoter, Don King, first in Remo-and then in Las Vegas. Now, King's rival Bob Arms, is prepared to negotiate with the Welshoman as light for the WBA title before the end of the year.

ingotiate with the Welstiaman as light for the WBA title before the end of the year.

Arun has invited Janes and his manager, Eddie Thomas, to Marssla, Sicily, where he is promoting the WBA title bout between the champion, Don Currie, and Roger Stafford in September. Jones will then probably be afferd a match with the winner in November and it could take place in London. "London could be a good verme," Arun said in Las Vegas. "There should he no problems. I could work with Mickey Duff or Frank Warren, though it would probably be Duff because he has Weahley."

Jones and Thomas are accepting the invitation to go to Marsalo, although November would be earlier than Thomas would wish. He would prefer Jones to take a long rest after two world fille bouts in five months. The offer is the result of the favourable impression Jones has made on American television in his two fights in the United States, and Arun's own opinion of him as an outstanding fighter, it may be an offer that Junes cannot refuse and a consolation for his defeat on a split decision is Las Vegas on Saturday.

FOOTBALL

To blow or not to blow?

Results from the English

nington Spec

Alan Robinson, the referee for the Charity Shield match at Wembley on Saturday, appears to be faced with the options of either defying the Football Association of his union, the Association of Football Referees and Linearies, over the question of the ac-called professional fout.

"It's a problem, but I'll be adopting a common-sense attribute."
Robinson who has hopes that the

Robinson who has lopes that the clash of opinion can be resolved before the match, said.

The problem arises from the insistence of FIFA, the international insistence of PPA, the international football federation, that the FA must wind-up their heavy punish-ment of the "professional foul". The FA acceded, and sent a memor-

forget last season's special instruc-tions regarding serious foul play.

But the referees' union have so far refused to revert to the previous interpretation of the laws, which leaves Robinson in his difficult

Athlete's loot - a contagion that is galloping in from Finland

Ringmasters crack their whips as the circus stars roll up

in the first world championships here have not been out on the track. After eight days ss activity they were moving as strongly and stealthily as ever on Sunday evening, at the official 2,000-strong bunfight - I should say reception - at the Dipoli athletes' village: the promoters of the permit meetings around the world, specially those over the next month, where the real business of today's athletics is

They were all there, from Los Angeles, Tokyo, New York and Zurich, sharp-eyed, smooth-tongued, and their pockets bulging, while the negro athletes swayed to the bosa nova, showing off to the flaxen Nordic girls by simultaneously balancing fell heart places on their heads. The full beer glasses on their heads. The Scandinavians bopped up and down self-conciously like Ted Heath's shoulders, and the heavy men from the throws stood around sphinz-like, their pint mugs seeming no bigger then egg-cups in those

It was like the Newmarket sales. I bumped into Arne Haukvik, the ringmaster from Oslo who has stage-managed I am trying to arrange some real races," he said with a mischievous twinkle. Yet at the end of these world championships the overriding question is: what is any longer

Is it the cat and mouse, pedestrian races we have predominantly seen here - in which the stars are competing not to achieve athletic excellence but for the prestige and status of medal positions which will subsequently enhance their market value on the international circus where record-breaking attempts are bartered, appearances bought and sold - or is it those staged, carefully choreographed races which result. The truthful answer

must be neither.

There were, in my opinion, only three leading contenders in the track events not run wholly in lanes - 800 metres and upwards - run as we might have expected them to rum 30 years ago, bravely up front, putting all their credentials publicly on the line and defying the rest to do their damnedest: Peter Elliott, Jarmila Kratochvilova and Mary Decker. It is for that reason that the men's 800 metres final, especially, and the women's 1,500 and 3,000 metres both brilliantly won by Decker, were the most memorible longer

present Tatyana Kazanina, we must go back to Juantorena in 1976 or to Bayi in the 1974 Commonwealth 1,500 metres, a glorious world record with Walker vainly

chasing his shadow.

As remarked by Stan Greenberg, that fount of wisdom and the brains behind the BBC television team, it is a myth fostered in Britain that "tactical" means running from the back it can far more dramatically mean draining the soul of those behind from out in front.

Peter Elliott ran the one way open to him to maximize his effort and in doing so meanly took a medal from a much faster man, as well as pulling out Curz of Brazil so fiercely he lost the gold. For the wrong reasons promoters will be more than anxious to have Elliott in their field

To those I have already mentioned must be added, of course, the two marathons, in which we had marvellous races won by the redoubtable favourites, Robert de Castella and Grete Waitz, from a cast of courageous challengers including such men as Balacha (Ethiopia), Masong (Tanzania), Stabl (Sweden) and Jones (Britsin), and Garean (Canada), Dickerson (US), Joyce (Republic of Ireland) and Smith (Britsin) among the women.

Yet even these two events were clouded by the absence of Lopes, of Portugal, second to Salazar, of the United States, the fastest marathon runner in history, de Castella in Rotterdam, and Joan Benoit, of the US the fastest over this distance.

The one thing which ought to have been

absent from these championships was the first A of IAAF (International Amateur Athletic Federation). The athletics world is caught up in a monstrous conspiracy to camouflage professionalism in order to preserve Olympic amateur participation. It is probable that the Soviet Union and East Germany sent below-strength teams and under-performed in Helsinki because they consider next year's Olympics in Los Angeles more important, whereas the athletes of leading Western capitalist countries were here in force because of the

commercial benefits to be derived. The administrators of the IAAF want to keep the wagon rolling with the top competitors on board because open professionalism would mean the end of prestige and free travel around the world for dozens of committee men and their wives. One of the worst moments of the races of the championships.

When did we last have great front runners such as Herb Elliott and Emil attopack? Before Miss Decker and the still recognize standing with them the 3,000

Elliott credentials on the line

metres steeplechase bronze medal winner of a few hours before, Colin Reitz. On Sunday night Primo Nebiolo, Italian president of the IAAF, strolled round the wast Dipoli reception party, his entourage of countries following at a discreet distance, like some patriarchal nineteenth century squire coming to see that the workers were enjoying themselves at

He could afford to smile. The wagon i said to have grossed over £4m, which will rise to a staggering £10m in Rome in 1987. With a so-called amateur body making such astronomic profits, the moral obligation upon them to initiate immediately world-wide random drug-testing, highly expensive, is more mandatory than

The contention of Sebastian Coe, that prize money is preferable to appearance money if either is to be allowed because it guarantees a commitment by the competitors, is sadly not foolproof, because competitors can still split the prize money equally in "arranged" races, just as they do in exhibition tennis, which is a shabby con trick regularly perpetrated upon the public. The love of money is assuredly the root of evil in sport.

Gold turns to bronze East Berlin (AP) - The Western media called East Germany the most successful team in Helsinki, but East Berlin newspapers yesterday listed them in third place behind the United States and the

Sources in the West put the East Germans first in mofficial tables with 10 gold medals, compared to eight for the mericans and six for the Rus

The East German Communist Party newspaper Neues Deutschland came to a different conclusion, using a system that allows seven points for a gold medal, five for silver, four for bronze, three for fourth place, two for fifth and one for sixth.

Under this system, the United States came out on top with 154 points, the Soviet Union were second with 152 and East Germany third with 150.

The carousel spins on to the Palace

sels at Heathrow were heavier by five individual medals and the collection from two relays when the British team arrived back yesterday.

And the round continues, with the European "Bruna Zanh" Cop at Constal Palace this weekend.

Crystal Palace this weekend.
Steve Cram's victory in the 1,500 metres has made him the new king of the circuit. He will be courted by the promoters of the remaining independent meetings throughout Europe, Cram, instead of Ovett (or Europe. Cram, insected of Overt for Coc, if there is any chance of a return so soon), will call the shots and perhaps even decide who will not run against him.

The first decision, an issue in

which he will be given priority, is his choice of event for next weekend. Each country is allowed weekend. Each country is allowed one athlete per event, and if Cram chooses the 1,500 metres, the selectors will have slight problem, if they cannot persuade Steve Ovett to run the 5,00 metres, a distance at which he has excelled in the past.

The problem would come if Oveti

RUGBY UNION

All Blacks' tour is postponed

Wellington (Reuter) - New Zealand's tour of Argentina, which was scheduled for October and was scheduled for October and November, has been postponed indefinitely, the chairman of the New Zealand Rugby Football Union, Ces Blazey, said last night. "It is hoped that the present difficulties will be soon resolved so that another date can be arranged for the postponed tour to take place", he said.

Relations between New Zealand and Argentina have been strained since New Zealand broke diplomatic ties during the Falldands crisis. Mr Blazey said negotiations for a replacement tour by the New Zealand team before the end of this Zealand team before the end of this year were continuing and it was hoped to be able to make an announcement within a week.

It has been reported that Newl Zealand will instead tour Ireland, but Harry Booker, assistant sto-retary of the Irish Rugby Union, said yesterday: We have no information whatsoever about such, a tour. We have not invited them, but we would love to see them, and but we would love to see them, and any approach would lave to come from them first. I imagine it must be a runtour as we have heard here that the All Blacks would be going to Scotland, but I spoke to the Scotlish RFU this morning and they know nothing about it either.

Australia's tight head prop, Stan Pilecki, is doubtful for the ational match against New international match against Zealand on Saturday (AFP reports). He has a back injury and was in considerable pain vesterday. The considerable pain vesterday. The injury opens the way for the return of Decian Curran, the Newcastle front row forward who was dropped from the Australian side after Argentina's recent 18-3 win in

Olympic request

New Delhi (AFP) - India have applied to stage the 1992 Olympis Games, the sports minister. Buta Singh, told Parliament here. The offer was made in a letter to the International Olympis Committee he said in reply to a question, but gave no further details. India hosted the 1982 Asian Games last December.

Nobody is stopping to get off after the world championships, which finished in Helsinki on Smoday. Those interminable lagsage carousels at Heathrow were heavier by the only response with a clear change individual models. The place is the finished fourth, and the colly response with a clear change of the colly response with a clear change.

Overt, and the memory of the latter's impressive heat in the AAA championships, where he looked capable of Imin 44eec and less, could be persussive. Overt freely admitted what everyone could see in Helsinki: "It was the worst race of the latter of the la my life," he said after finishing fourth in the 1,500 metres. But that defeat does not necessarily signify the end for Ovett.

the end for Ovett.

He has had more than his fair share of misfortune in the last two years, with illness and injuries putting a halt to his seemingly invincible run. But the factor which threatens to militate most against his return to the highest niche, which Cram has appropriated, is the length of time that Ovet has been a too-class athlete. He has been a top-class athlete. He has been a winner in all but a handful of races **EQUESTRIANISM**

New days

dawn at

Burghley

world champion.

Daley Thompson is so good at 10 svents that it would be invictious to expect him to have the time to be extra special in just one. But it is not inconcrivable that Thompson will be selected for the long jump on Saturday, when the British team is anyonized in Lendon this morning. annouced in London this morn One event that got a little overlooked, because of its scheduling on Saturday evening, in Helsinki, was the women's javelin, in which Fatima Whithread produced, if not quite the longest, by furths best performance of her title Sha

duced, if not quite the longest, by far the best performance of her life. She went to Helsinki, after a bout of tonsilitis, and had even been advised not to go at all. Miss Whitebread was leading the competition until the final throw, when Tima Lillak launched, and the collective will of her 70,000 competitions antiained her is union to

compatriots sustained her javelin to just beyond Miss Whitbread's mark.

Miss Whitbread's performance will undoubtedly give her the javelin place, although that was only javelin place, although that was only the third time that she has beater TENNIS

By Jenny MacArthur For the first time since the event began 22 years ago, the Burghley. Horse Trials, sponsored by Remy Martin, will be run over five days. They take place on September 7 to 11 at Burghley House near

Stamford.

The Young Riders' European championship is the reason for the extension. Seven nations are comesting the championships, which begins with the dressage on Wednesday. Their cross)country, over the same course as the seniors, is on Friday, and their competition finishes with the show jumping on Samrday after which Princess Anne, the individual European champion at Burghley in 1971, will present the prizes. prizes.

The 12 young riders who have carned their place at Burghley, and from whom the final team of four will be chosen, include Madelenne will be chosen, include Madelenne

will be chosen, include Madeleme Gurden, aged 20, on The Done Thing, who node one of the fastest cross-country rounds at the Locko horse trials last weekend. Although she dropped from third to eighth place after knocking two down in the show jumping, she gave one of the most impressive performances by a young rider.

The cost of putting on Burghley

by a young rider.

The cost of putting on Burghley this year is estimated at £240,000 compared with last year's £190,000. Remy Martin are putting £200,000 into Burghley over the next three years. Any profit from the event (last year it was £49,300) goes to the British Horse Society, who phough it back grite three day eventure.

British Horse Society, who plough it back into three day eventing.

Most of leading three day eventing.

Most of leading three day eventers will compete in the trials.

Lucinda Green is likely to ride Beagle Bay, on whom she won this event in 1981, and Richard Meade is hoping that Kilcashel will be fit in time for the event.

Philip Herbert, the course builder, has made 11 new fences this year. Our of deference to the

brilder, has made 11 new fences this year. Out of deference to the sponsors, he has created the Brandy Grass Alternative, through which riders have several choices of line, shart list: for faropsen Young Riders' champit natice thorn Verture (R Bevent, The Dense Thing (M Garden), Blaco Hill C Hagan), Bager R. Mardodd, Vernare Booty (M Grahard), Pompoy (R Powell, Mr Moor Li Sanabary), Dains It of Schwierdt, Solo (J Sanabary), Dains It of Schwierdt, Solo (J Sanabary), Bager R. Strains, Misserters, Sparroutines (G Strainsch), Chi Micholes Mr (J Trouggood), Risserver, Heinrich (G A Pounce), Megaria (J Weigglesmorth).

More of the same for Mrs Lloyd

Manhatten Beach, California (Renter) - Martina Navratilova beat Chris Lloyd 6-1, 6-3 in 58 minutes to win the Los Angeles women's championship. The tournament was regarded as a preview of the United States Open to be played later this month and the result established Miss Navratilova as the favourite to win the title which has always eluded her.

win the title which has always chided her.

Even Mrs Lloyd admitted that Miss Navratilova was pulling away from her. "This was our third meeting this year and I haven't won a set yet," she said, "So I guess you could say the gap is widening." Miss Navratilova forced Mrs Lloyd into errors in the first set, broke her service three times and quickly opened up a 5-0 lead. The match was so one-sided at this point that when Mrs Lloyd finally held service the crowd responded with prolonged applause.

• Montreal: Ivan Lendl beat Anders Jarryd 6-2, 6-2 to win the Canadian open championship. Jarryd, ranked eighty-third in the world, reached the final by defeating the No. 9 seed, Eliot Teltscher, the No. 7 seed, Vitas Gerulaitis, and the top seed, John McEnroe, but was no match for Lendl, the No. 2 seed. Lendl won the event in 1980 and 1981 but lost to Gerulaitis in last.

1981 but lost to Gerulaitis in last

Not amateurs, Argentina says

Caracas (Reuter) - Argentina is to protest to organizers of the minth Pan American Games, which opened here on Sunday, that three members of the United States tennis sionals, according to team are professionals, according to Hector Pistelli, the Argentine tennis

Hector Pistell, the Argentine teams teams manager.
Pistelli said that Eric Korita, Gretchen Rush and Louise Allen, were members of the professional teams players' association (ATP) and "they are thus ineligible to play in the Pan-American Games". The Argentina tax four players could enter, he said.

Mike Moran, press spokesman of the US delegation, rejected the charges against the three players.

"They are fully amateur", he said.

YACHTING Facing up to the

Miss Kinch, who is only 19 years old, broke Mary Rand's Brinsh record, which has stood since 1964, in her first jump of Sunday's competition in Helsinki. Miss Kinch reached 6.90 metres, and also have 100 metres, and also have 100 metres, and also have 100 metres.

leapt 6.93 metres when the wind was just over the limit.

Frank Dick, Britain's director of coaching, pronounced himself well satisfied with the medal tally of seven. Of the 25 countries who contested 123 medals, Britain was

contested 123 means, Britain was sixth. Only the United States, of course, of the countries shead of Britain - East Germany, Soviet Union, Czechoslovakia and West

Germany were the others - will not be competing at Crystal Palace next weekend.

wind again By John Nicholls Isn Pinnell and Jeremy Hartley from Tynemouth, won an unexpec

from Tynemouth, won an unexpec-tedly windy race, sponsored by Howe and Bainbridge, on the second day of the National 12 Class chempionship at Llandudno yester-day. After a formight of gentle, north-easterly breezes, it seemed strange to be faced once again with the musicamary south-westerly and a the customary south-westerly and a cloudy sky.

No doubt a majority of the 80 entries preferred the exercising of their limbs to the perplexities of racing in calm conditions, although a few of them might have settled for something in between. Offshore, away from the deceptively smooth water by the beach, the wind was a steady force five with stronger gusts. Many crews showed their lack of Many crows showed their last to practice in dealing with over-full sails and a suddenly unresponsive tiller, by capsizing on their way out to the course. The start was delayed to allow most of the stragglers time to recover, but a few failed to reach the line or chose to retire while the string ways spool. going was good.

Those that remined were s Those that remined were steamy whittled down from the 76 that left the beach, to 58 at the first mark and 43 by the finish. As usual in such enditions, the leaders appeared to be completely in control at all times, and drove their boats powerfully around the triangular course. The tail-enders, on the other hand, wobbled their way found. keeping the recorders and the rescu fleet fully occupied.

Most of the leading group chose to pass early through the starting to pass early tarongs has saturally gate, and were led by Roger Yeoman and Carolyn Jaffe at the windward mark. A few lengths astern was the powerful, all-male crew of Pinnell and Hartley, who soon wore down the lighter crew ahead, and took over the lead. Yeoman was still second on the second round, but fell away to eighth by the finish, allowing John and Sarah Sears to take second place for the second day maring.

SECOND RACE: Fort of Physicush Cupt 1, Willy Are You () Physial and J Harday(; 2, Bloyder Cipe () and Mrs 8 Sears(; 3, Bagoy Asstraint (M and Mrs 8 Hoylet; 4 bashale (M Honderson and Mrs 8 Mighelf; 5, Dick Docker (D and M Booth); 6, Aces High (A and Miss J Shorroof).

CONTRACTS **ADMINISTRATOR**

This is undoubtedly one of the most important areas when dealing with national accounts, and one that's certainly here to stay! So when one of the markets leading name manufacturers appoints a Contracts Administrator to cross the 't's' and dot the "i's", it has to be seen as not just another bit of red tape, but the first serious attempt to help management streamline agreements effectively.

Your role will be to creatively influence the direction of both company management teams and customers, bringing contracts to a satisfactory conclusion.

The requirement is for an individual of the highest calibre with a preferred background in high technology industry. Your career path after a degree in business administration will have included experience of company secretariat function, and dealings with all levels of management. A comprehensive benefit package includes an excellent salary.

Telephone Carolyn Simpson for an application form on Harpenden (05827) 69828 (answering service out of hours) or write with full c.v. to Tektronix U.K. Ltd., Freepost, Harpenden, Herts, AL5 4BR.

 One of the failures of modern
 American society is the subject of a
 depressing, but well-made
 documentary THE BRONX AFTER THE FIRES (ITV 10.30pm). Situated less than half-an-hour from the atfluence of Manhattan, the South Bronx has been in decay for at least a decade and during that time come 80,000 homes have been

andoned. Those still living there face a short and grim life with the area having the Western world's highest rates for infant mortality, crime and drug abuse. This latter blight has led to instances of new-born babies being dried-out from heroin addiction inherited from their mathests. Amond backlook with mothers. Amoral landlords, with their eyes on insurance money, try to drive out their tenants, mostly by Mark Wingett as PC Carver: ITV attempted arson and the documentary focuses on two

CHANNEL 4

5.30 A Poli Life. in the third of her seven-part series of interview with people who have lived a long and interesting life JIII Coctrane is at the Archbishop's Palace in Canterbury talking to Roselind Funcie. The Archbishop's wife elics about her love for and how her husband's elevation has made a that might have startled her

6.00 Divided We Stand. The first of a six-part series that charts the life of consensus politics from its birth in the 1930s to its disintegration today. This opening programme examine how Birmingham, a pre-World War Two Conservative stronghold, has been, since the 1945 general election, a

Defence cuts deal by Israel Cabinet

From Christopher Walker Jerusalem

The atmosphere of crisis surrounding Israel's troubled economy intensified yesterday as Cabinet ministers convened for their fourth session in less than a week to try and agree on

a rescue attempt.

During the first of two extraordinary Cabinet sessions during the day, Mr Yoram Aridor, the finance minister, is understood to have tendered his resignation in protest against the refusal of Mr Moshe Arens, the defence minister, to agree to a sweeping £240m cut in the military budget.

Israeli sources reported that Mr Aridor made his threat after Mr Arens appeared to secure the backing of Mr Menachem Begin, the Prime Minister, in his resistance to the demanded cutback. Later, a terse official communique said the two opposing ministers and their staff have been told to meet to

draw up "an agreed proposal".

Shortly before the second of the day's Cabinet meetings was due to start, associates of Mr minister appointed since the Likud came to power in 1977 – said that he had agreed to delay his resignation after represen-tations from Cabinet colleagues.

Mr Aridor and his aides are known to have been infuriated at the difficulty in securing Cabinet backing for their proposed £705m austerity pack-

As the second meeting got under way, ministers said that a compromise on the defence cuts had been agreed which would limit them to £190m over three years rather than the original demand of an immediate £238m cut. Further emergency be discussed at ministerial level over the next few days.

The most critical is seen as the proposed £89m cut in education which would end Israel's present system of free secondary schooling. The plan is being vigorously opposed by Mr Zevulun Hammer, Edu-cation Minister who is due back from a foreign trip later this

According to the Central Vureau of Statistics, Israel's trade deficit in July spiralled to a total of £295m compared with only £248m in July, 1982. During the first seven months of this year, the overall trade deficit totalled £1,350m.

Royal holidaymakers bound for Balmoral

Sailing in: Members of the Royal Family disembarking from the Royal Yacht Britannia at Aberdeen yesterday for the start of their annual summer break. Climbing down the steps behind the Queen was Prince Andrew, who sported a new beard, while Prince Edward looked sun-tanned and Princess Anne and her daughter Zara, walked in step as they came ashore. The Oueen chatted to a welcoming party before

One of 'Cowley 13' admits lying to join BL

Continued from page 1

understood to be a small warehouse in Birmingham. But Miss Grant said that she had nothing to do with most of the other 12 dismissed workers. "I am not a member of the Socialist League, I am a member of the Labour Party.

"I support a paper called Socialist Action. I read it, and I buy it. I am a socialist, and I do not believe there is anything wrong with that."

a socialist who wanted a job. I lied to get a job because I knew that if BL management knew I was an activist and active in my trade union, they would not give

She added: "I come from Birmingham, and I know what happens to people like Derek Robinson ['Red Robbo', the BL convener dismissed four years ago] and Alan Thornett [the Trotskyist shop steward dis-

"I say again there was no conspiracy on my part to get a job other than I put two lies on the application form. I would like to ask people: 'Do they think I have no right a job because I am a socialist, and because I believe in supporting a trade milen?'

Miss Grant said that she did not think she would find another job, because of the publicity surrounding her case.

Her job at Cowley was to put speakers into dashboards. It involved shift work. At Birmingham Polytechnic she was active in the students

Miss Grant refused to name the woman friend who had helped her to fill in the application form.

The woman sitting next to her at the press conference gave her name as Miss Valerie-Coultas. The room had been booked by the Socialist League.

Letter from Budapest

In the fast lane to a socialist Gomorrah

dence trick. Judging by the map, it is the very model of a modern socialist capital: Peoples Republic Street is intersected by Lenin Boulevard, there is a Marx Square, an Engels Square and the Karl Marx University of Economics. The scene seems to be set for troops of apple-cheeked Young Communist pioneers marching under red banners towards the millenium.

A stroll along Peoples Republic Street (formerly Stalin Street: in eastern Europe streets shed names as rapidly as divorcees) presents a different picture, eloquently charting Hungary's conversion from a workers' state ("Forward, comrades") to a workercum-consumer society ("Buy now while stocks last"). It is a generously pro-

portioned thoroughfare dotted with dilapidated but still beautiful turn of the century courtyards, protected by sculpted wrought iron gates. In scuipled wrought fron gates. In swift succession, on the way to the opera, there is a camping centre, a hairdresser claiming loyalty to Vidal Sassoon, posters advertising classes in Jane Fonda aerobics and Yoga, a theatre booking office (Jesus Christ Superstar, Cats) and a hunting shop selling at manageable prices rods and leather boots.

Through the windows of a rafe, two delegates to a world Esperanto congress can be seen stroking each other's cheeks over an iced coffee.

For a visitor from Poland where farmers are paying black market prices for rubber wellingtons and where coffee is virtually unobtainable in shops, for a middle-aged Soviet tourist who can still remember when Esperantoists were once equated with Trotskyists, for an East German who regards aerobics if not Jane Fonda with some suspicion. Peoples Republic Street must seem like the fast lane to Gomorrah.

The vision of a leisured society is perhaps deceptive. Hungarians work very hard: the difference is that they do so for themselves and not for the greater glory of the state or its ideology. The average wage is technically about \$125 (£83) a month but nobody is fooled. Most people have second jobs or take on freelance assignments. Workers lease factory space to make their own goods to be sold privately or to repair cars. and pensioners

work tax free as caretakers.

The system, which strives to

Budapest is an artful confiistrative directives and orders with economic incentives. encourages this work (even if the revenue is undisclosed) which is also a symptom of the large, expanding black market. But though the Hungarians

work hard, they also spend hard. There are at least two legal casinos in the capital, shops slash the prices of goods that are difficult to budge (Russian radios, for example). Advertisments on television deploy scantily clad girls to sell take-away fried chicken. caravans, new stretch trousers and visits to restaurants and cinemas. And this is social-

There is a price to pay for the Hungarians. One is an overwhelming obsession with the material that has not so much killed socialist ideology as put it to sleep to the accompaniment of lullabies.

The sense of being better off than anybody else in the communist block has led to a shift of perspective. Now Hungarians compare themselves with the Austrians rather than East Germans. From one of Budapest's ubiquitous baths last week came the fluting tones of a woman in a neighbouring changing room, speaking in German: "Well of course, my dear, they have f-r-e-s-h orange juice in Vienna. The core of market socialism is that there must always be

someone left over to envy.

The other price for the freedom to satisfy consumers under socialism is an openly declared fidelity to Moscow. Although the leadership may have its doubts about the stationing of new Soviet missiles in Hungary, it is certainly not going to allow an independent peace movement to articulate these doubts. But the authorities at least try to tidy up the problem of dissident opinion in a Hunga-

Peace activists are warned at work, their apartments are searched, publications are confiscated but arrests are rare and harassment is not as relentless as in some of Hungary's neighbours.

The calculation is simple enough: though they may discuss the ideas of dissidents in student clubs and cafes, few people are willing to risk material well-being to express opposition in an organized way. Economic prosperity breathing space

Roger Boyes

The papers

The Daily Mirror comments. "The moles in BL's Maestro works at Cowley may give their alegiance to Karl Marx, but they owe their tactics to Groucho. Fake references and bogus addresses were bound to be found out... The wonder is not that they were uncovered but thest they that they were uncovered but that it took so long.... The Cowley Markists must not be used as an excuse for a general mole hunt in British industry. That could lead to political screening of employees. Once started, there is no telling where it might end."

The Daily Express comments:
"Mrs Thatcher was wise to seize on
the Argentine request for an IMF
loan as a lever for securing the
release of British company funds
frozen in Buenos Aires. No Release, no loan, she said. Quite right. If bullies understand one thing it is

Tenant exchange

Exchange Scheme may be of help to tenants of local council, a new town, a housing association, the Development Board for Rural Wales or the Northern Ireland Housing Executive who want to move to naother area. The computer-based scheme looks for tenants in other parts of England, Wales and Northern Ireland who want to exchange homes. A leastet and registration form is available from local housing offices, housing advice centres of Citizens Advice Bureaux.
